Australia's trade highlights 2009¹

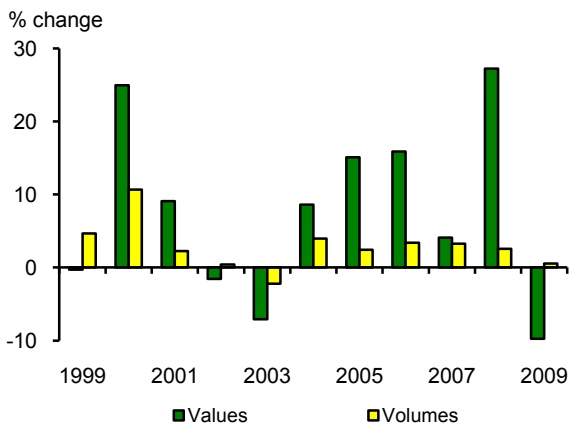

Australia's trade in goods and services

Source: ABS catalogue 5368.0 (March 2010).

- The value of total trade in goods and services decreased 10.0 per cent to \$506.8 billion (see **Box 1**).
- In volume terms, total trade decreased 3.9 per cent in 2009 compared with 2008
 - since 2004, total trade values have increased by an average of 9.8 per cent per annum while volumes increased 4.9 per cent per annum.
- The trade deficit decreased by \$2.3 billion to \$7.1 billion.

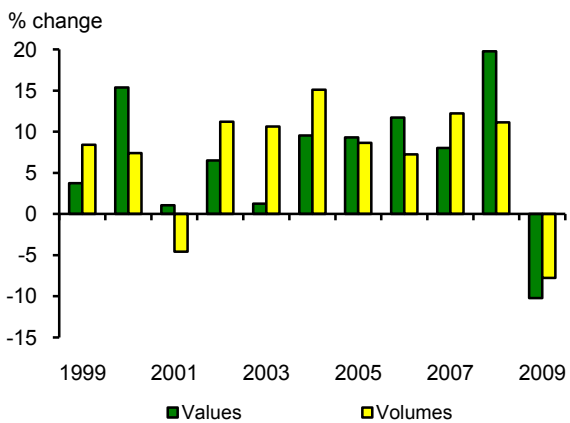

Australia's exports

Source: ABS catalogue 5368.0 (March 2010).

- The value of exports decreased 9.8 per cent to \$249.9 billion
 - nevertheless, since 2004, export values have increased by an average of 11.0 per cent per annum.
- Export volumes increased 0.6 per cent
 - export volumes have risen by an average rate of 2.6 per cent per annum since 2004.

Australia's imports

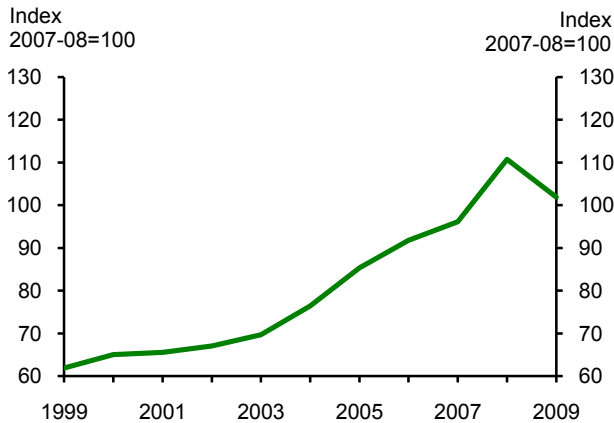

Source: ABS catalogue 5368.0 (March 2010).

- The value of imports decreased 10.2 per cent to \$256.9 billion
 - still, since 2004, import values have increased by an average of 8.7 per cent per annum.
- Import volumes decreased 7.8 per cent
 - import volumes have risen by 7.3 per cent per annum since 2004.

¹ Balance of payments basis.

Terms of trade

Source: ABS catalogue 5368.0 (March 2010).

- Australia's terms of trade² fell 8.2 per cent in 2009
 - this was a result of export prices decreasing 10.1 per cent and imports prices falling 2.1 per cent.
- Since 2004, export prices have risen by an average rate of 8.2 per cent per annum, while import prices have risen by 1.5 per cent per annum.

Box 1: Trade overview

The worse global recession in the past 75 years saw global trade flows (in volume terms) fall by 10.7 per cent in 2009. Australia was not immune to the impact of the world recession, with two-way trade in goods and services falling 10.0 per cent to \$506.8 billion (with volumes falling 3.9 per cent).

Australia's exports values fell by 9.8 per cent in 2009 to \$249.9 billion, with *Primary products*, *Simply transformed manufactures* and *Elaborately transformed manufactures* all falling in 2009. Within *Primary products* exports of *Fuels* and *Minerals* decreased significantly down 14.7 per cent on the back of lower world commodity prices. Exports of *Other goods* (mainly *Gold* and confidential items) and *Services* rose during the year.

However export volumes rose 0.6 per cent in 2009, making Australia one of only three OECD economies to record export volume growth in 2009 (the others being Iceland and New Zealand).

Australia's import values in 2009 fell 10.2 per cent to \$257.0 billion (with volumes falling 7.8 per cent). The fall in imports during the year was underpinned by a slowing Australian economy (with reduced domestic consumption and investment). As a result of imports falling faster than exports, the trade deficit improved \$2.3 billion to \$7.1 billion.

Australia's terms of trade decreased by 8.2 per cent, from their peak in 2008. The fall in the terms of trade was mainly the result of a 10.1 per cent fall in export prices, due to falling world commodity prices for many resources and energy exports.

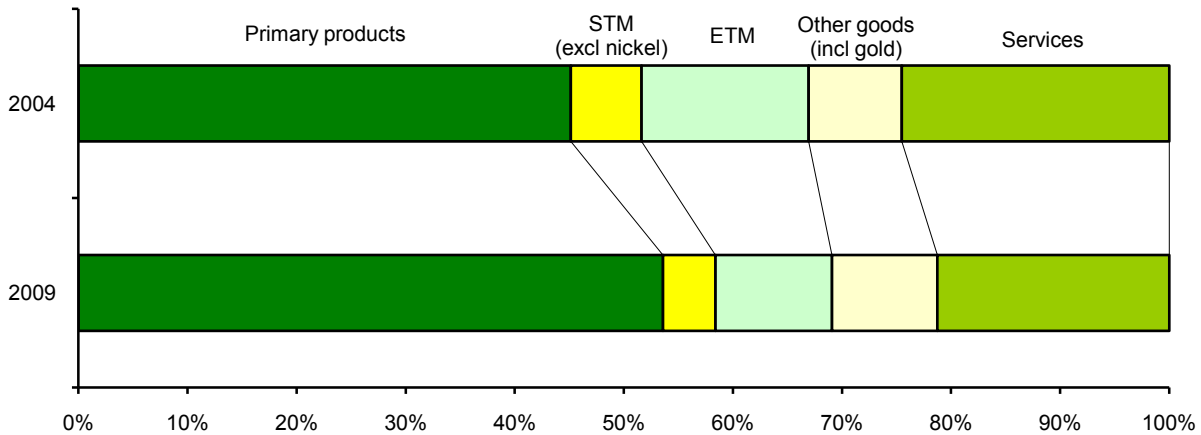

² The Terms of trade are calculated as the ratio of the price we receive for our exports to the price we pay for our imports.

Australia's composition of trade³

Exports

- In 2009, exports of *Primary products* decreased 12.4 per cent to \$133.5 billion—reflecting large decreases in energy and iron ore prices, *Manufactures* fell 17.9 per cent to \$38.6 billion, *Other goods (incl gold)* exports increased 5.6 per cent to \$24.1 billion and exports of *Services* rose 0.8 per cent to \$53.0 billion.

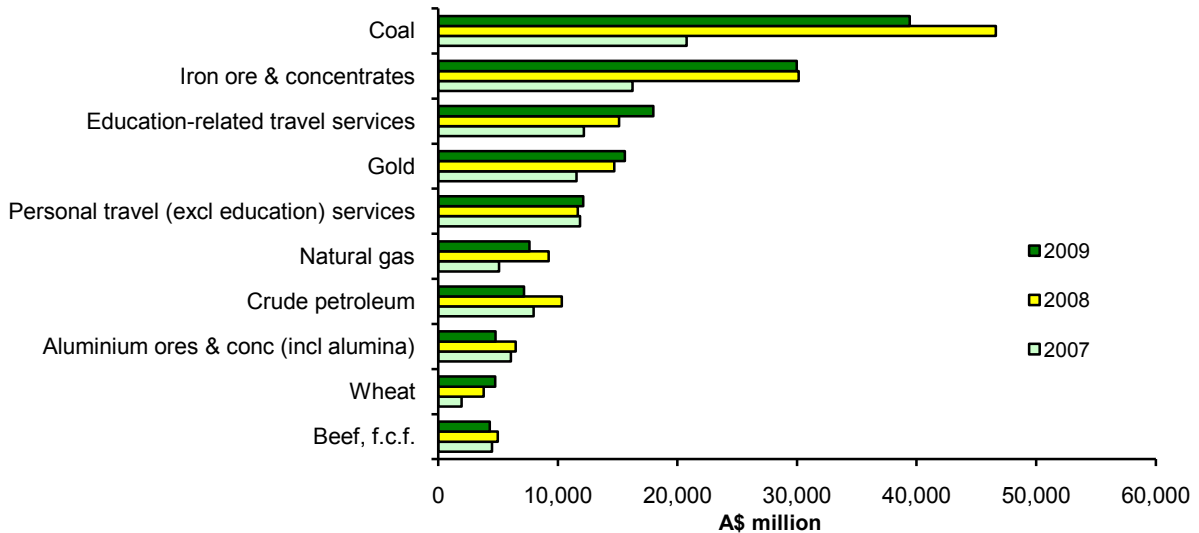

Broad composition of exports: 2004 and 2009

Sources: ABS trade data on the DFAT STARS database and ABS catalogue 5368.0 (March 2010).

- Coal* (\$39.4 billion), *Iron ore & concentrates* (\$30.0 billion), *Education-related travel services* (\$18.0 billion) and *Gold* (\$15.6 billion) were Australia's largest individual export items.

Australia's principal exports

Sources: ABS trade data on the DFAT STARS database and ABS catalogue 5368.0 (March 2010).

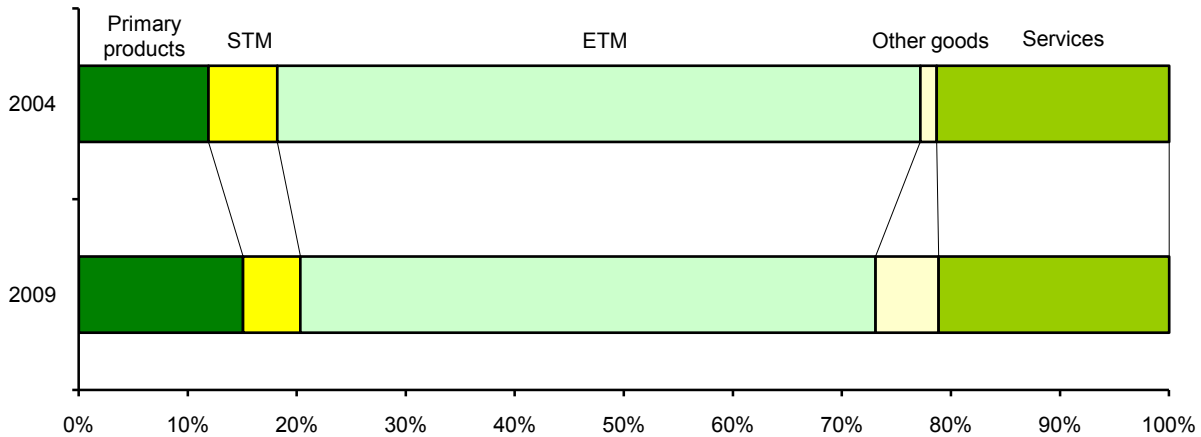

- Exports of major items recording a fall in 2009 included: *Crude petroleum*, down 30.6 per cent to \$7.2 billion; *Aluminium*, down 29.4 per cent to \$4.1 billion; *Aluminium ores & concentrates*, down 25.9 per cent to \$4.8 billion; *Natural gas*, down 17.5 per cent to \$7.6 billion and *Coal*, down 15.4 per cent to \$39.4 billion while *Education-related travel services* rose 19.0 per cent to \$18.0 billion.

³ Goods on a recorded trade basis and services on a balance of payments basis.

Imports

- Imports of *Primary products* decreased 21.6 per cent to \$38.3 billion in 2009—reflecting significant decreases in energy products, especially crude and refined petroleum, *Manufactures* fell 10.5 per cent to \$147.5 billion, *Other goods* imports rose 21.0 per cent to \$14.7 billion—reflecting a surge in gold imports, and imports of *Services* decreased 6.7 per cent to \$53.8 billion.

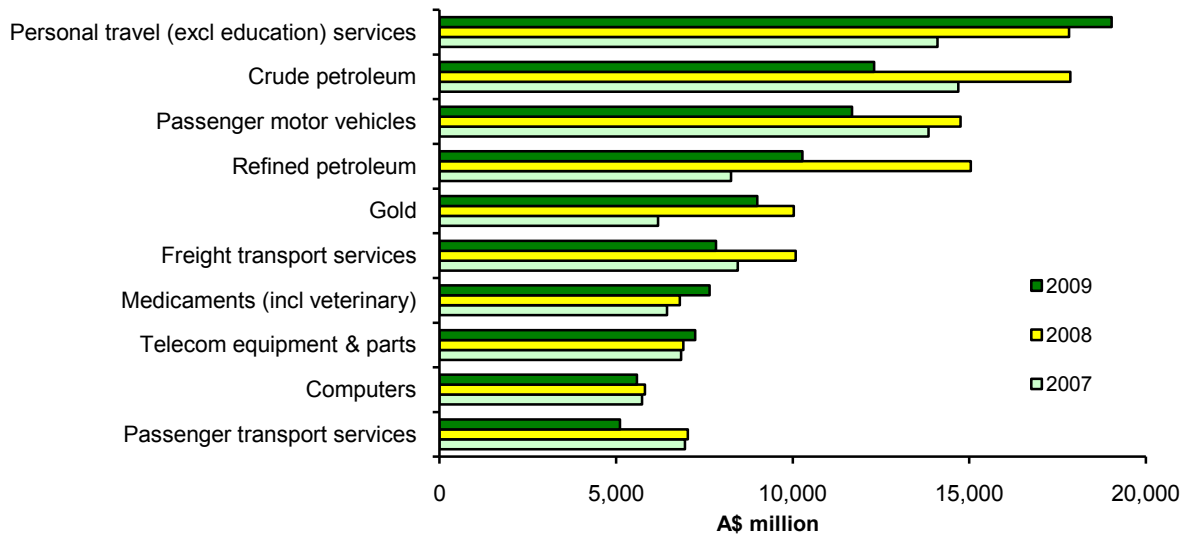

Broad composition of imports: 2004 and 2009

Sources: ABS trade data on the DFAT STARS database and ABS catalogue 5368.0 (March 2010).

- Personal travel (excl education) services* (\$19.0 billion); *Crude petroleum* (\$12.3 billion), *Passenger motor vehicles* (\$11.7 billion) and *Refined petroleum* (\$10.3 billion) were Australia's largest import items.

Australia's principal imports

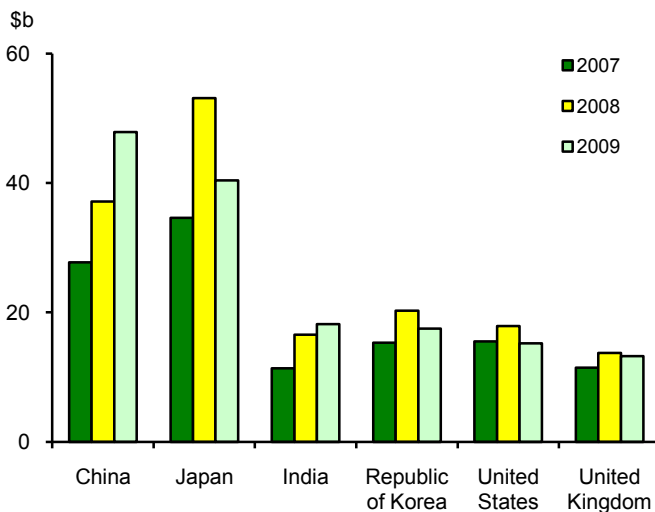

Sources: ABS trade data on the DFAT STARS database and ABS catalogue 5368.0 (March 2010).

- Imports of major items which recorded a fall in 2009 included: *Goods vehicles*, down 33.7 per cent to \$4.4 billion; *Refined petroleum*, down 31.7 per cent to \$10.3 billion; *Crude petroleum*, down 31.1 per cent to \$12.3 billion; *Passenger transport services*, down 27.3 per cent to \$5.1 billion and *Freight transport services*, down 22.3 per cent to \$7.8 billion.

Australia's direction of trade

- China was Australia's largest individual two-way goods and services trading partner in 2009, accounting for 16.8 per cent (\$85.1 billion) of total trade.
- APEC members accounted for 68.6 per cent of Australia's total trade.
- Exports to APEC members decreased 7.6 per cent; ASEAN members fell 11.2 per cent; OECD countries decreased 18.8 per cent; and members of the European Union fell 19.4 per cent.
- Imports from APEC members fell 11.4 per cent; ASEAN members decreased 16.4 per cent; members of the European Union fell 14.2 per cent; and OECD countries decreased 13.3 per cent.

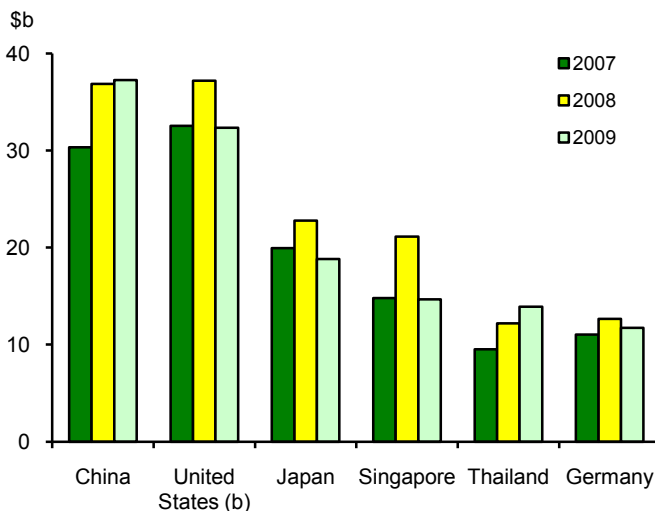

Major export markets

- China was Australia's largest export market, accounting for 19.2 per cent (\$47.9 billion) of total exports in 2009
 - rising 29.0 per cent.
- Japan was Australia's second largest export market (\$40.4 billion)
 - decreasing 24.0 per cent.
- India was Australia's third largest market (\$18.2 billion)
 - rising by 9.9 per cent.

Source: ABS catalogue 5368.0 (March 2010).

Major import sources

- China was Australia's largest import source, accounting for 14.5 per cent (\$37.3 billion) of total imports in 2009
 - rising 1.0 per cent.
- The United States^(a) was Australia's second largest import source (\$32.4 billion)
 - decreasing 13.0 per cent.
- Japan was Australia's third largest import source (\$18.8 billion)
 - falling 17.4 per cent.

(a) Excludes imports of large aircraft from September 2008 onwards.

Source: ABS catalogue 5368.0 (March 2010).

ABARE commodity forecasts

- ABARE has forecast the value of Australia's commodity exports to fall by 17.8 per cent in 2009-10 (while export volumes—or real terms—will rise by 6.3 per cent). See **Table A** for more details.

Table A: ABARE Forecasts for major commodity exports (a)

Australia's Resources exports 1999 to 2009

Resources have been an important export sector for Australia since the 1850s gold rush. This pre-eminence has grown in importance over the past 10 years with exports of resources, increasing over three fold from \$37.9 billion in 1999 to \$130.8 billion in 2009. With strong world economic growth giving rise to higher commodity prices, Resources have dominated the growth in nominal exports for Australia over the period. Their share in total exports has risen from 32.7 per cent in 1999 to 52.4 per cent in 2009.

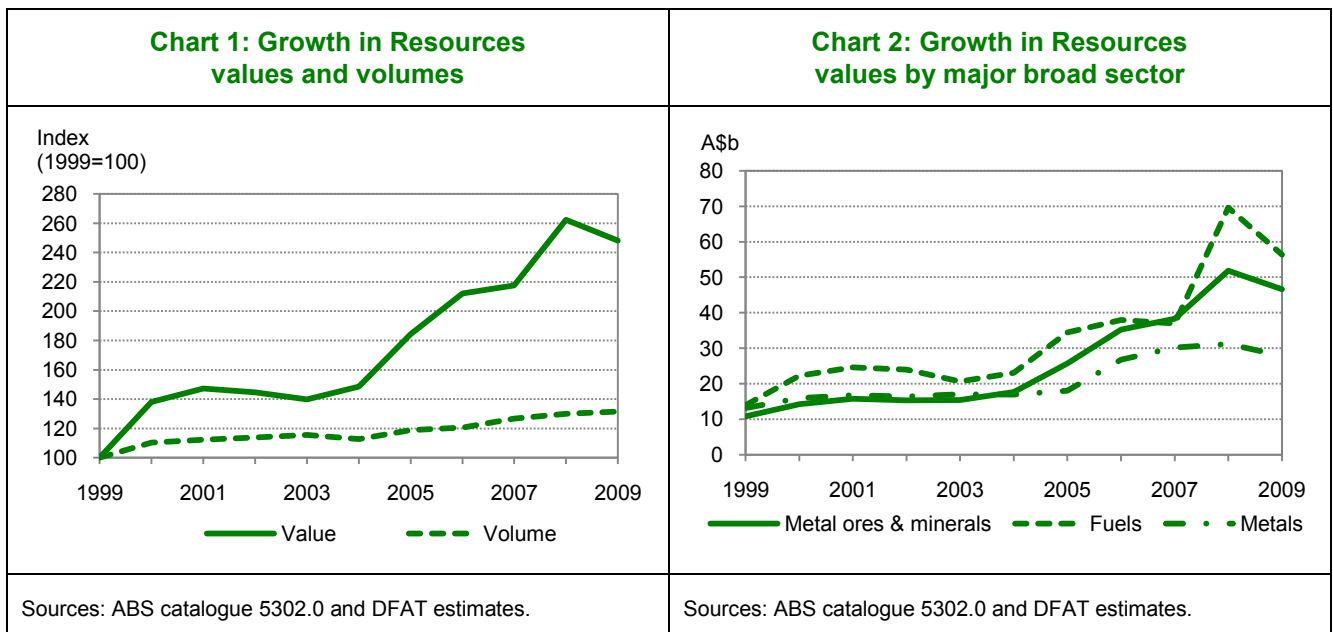

The significant rise in the nominal value of Resources exports has played a major part in the growth in Australia's terms of trade over the past 10 years (through increased export prices). The increase in the terms of trade has led to a significant rise in Australia's Real Gross Domestic Income.

Overall trends in resources exports

The value of Australia's exports of *Resources*⁴ have increased from \$37.9 billion in 1999 to \$130.8 billion in 2009 – see **Chart 1**. This represents an average growth of 13.4 per cent per annum, compared with total Australian exports that grew by just 7.8 per cent on average per annum (and non-resource exports growing by just 3.6 per cent per annum). *Resources* as a share of Australia's exports accounted for 32.7 per cent in 1999 rising to 52.4 per cent in 2009 (peaking at 55.1 per cent in 2008).

In volume terms *Resources* exports increased by an average annual growth of 2.6 per cent per annum, compared with total Australian exports which rose by an average 2.3 per cent per annum over the period.

Growth in both value and volume terms has been stronger in the past five years (2004 to 2009) with export values rising by an average 19.3 per cent per annum and volumes rising 3.8 per cent on the back of the commodity boom, driven by demand for resources by emerging economies, such as China.

⁴ *Resources* exports includes *Metal ores & minerals*, *Fuels* and *Metals* (including gold) from ABS Balance of Payment statistics. A DFAT estimate for the value of exports of *Nickel mattes* and *Nickel unworked*, which are not included in ABS resources exports, has been included.

Resources exports by broad type and market

Within *Resources* exports – see **Chart 2**, *Fuels* was the largest category accounting for 43.1 per cent of *Resources* exports in 2009. *Fuels* export values have grown from \$14.0 billion in 1999 to \$56.3 billion in 2009, representing average annual growth of 13.8 per cent per annum (with volumes growing 1.9 per cent per annum). *Metal ores & minerals* was the next largest category accounting for 35.6 per cent of total *Resources* exports in 2009. These exports have grown from \$10.8 billion in 1999 to \$46.6 billion in 2009, representing average annual growth of 17.1 per cent per annum (with volumes growing 5.5 per cent per annum). *Metals* (including gold) accounted for 21.3 per cent of total *Resources* exports in 2009. *Metals* exports have grown from \$13.2 billion in 1999 to \$27.9 billion in 2009, representing average annual growth of 8.8 per cent per annum (with volumes growing by just 0.2 per cent on average over the same period).

Table 1: Top 5 Resources exports

	1999			2009		
	A\$b	% share		A\$b	% share	
Total Resources exports	37.9		Total Resources exports	130.8

Aluminium ores & conc	2.8	7.4	5	Crude petroleum	7.2	5.5

(a) Balance of payments basis.

Sources: ABS trade data on DFAT STARS database, ABS catalogue 5302.0 and DFAT estimates.

Australia's top five *Resources* exports in 2009 were *Coal*, *Iron ore*, *Gold*, *Natural Gas* and *Crude Petroleum* – see **Table 1**. These top five exports accounted for 76.3 per cent of all *Resources* exports in 2009. *Coal* and *Iron ore* alone accounted for 53.0 per cent – for more information on the performance of Australia's *Coal* and *Iron ore* exports refer to the article **Australia's Coal and Iron ore exports 1999 to 2009** in this publication. In 1999 the top five exports were *Coal*, *Gold*, *Iron ore*, *Aluminium* and *Aluminium ores (incl alumina)*.

Chart 3: Australia's Resources exports by major market 1999

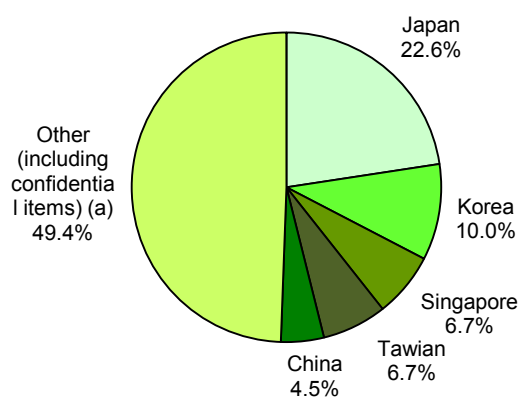

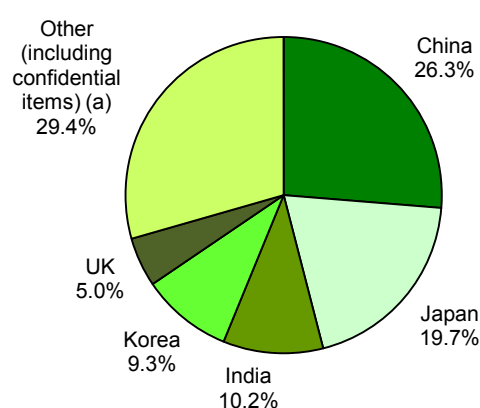

Chart 4: Australia's Resources exports by major market 2009

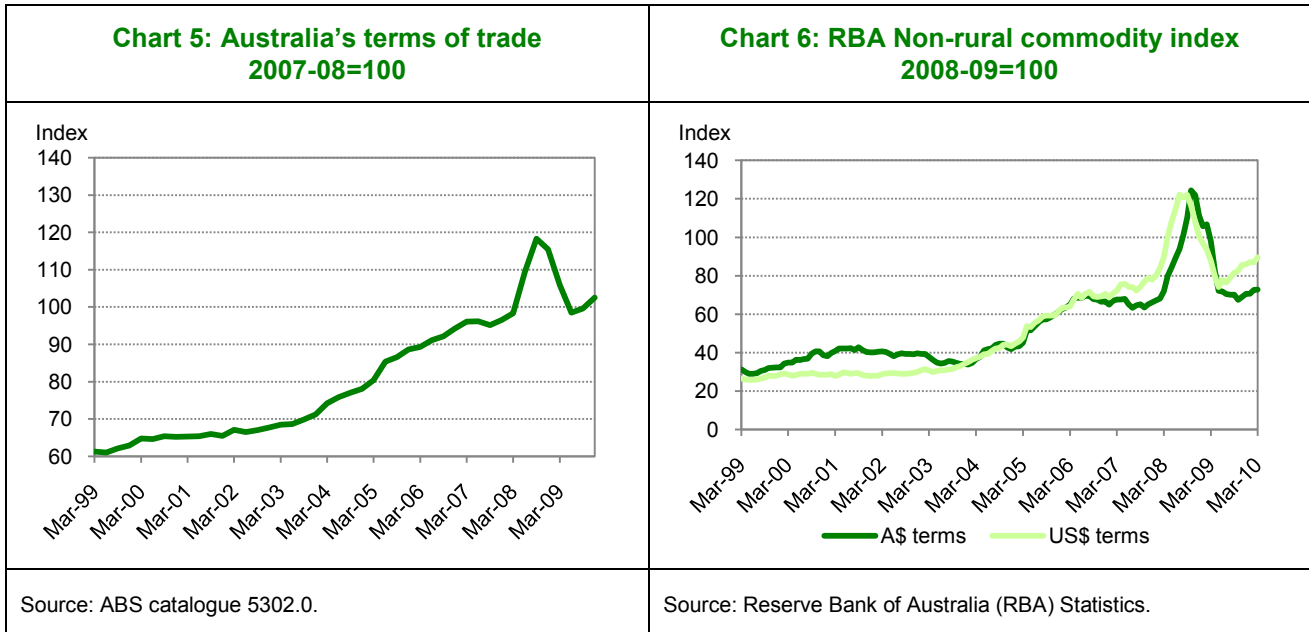

(a) A significant proportion of *Resources* exports are country confidential in ABS trade statistics (\$6.9 billion in 1999 and \$14.8 billion in 2009). The major items are *Natural Gas*, *Alumina*, *Mineral sands*, and *Uranium ores*. *Nickel alloys unworked* are also confidential from 2002 onwards. Please note that these confidential resource commodities would have an impact on these market shares.

Source: ABS trade data on the DFAT STARS database.

In 1999 the top five markets were Japan, Republic of Korea, Singapore, Taiwan and China – see **Chart 3**. Australia's major markets for its *Resources* exports in 2009 were China, Japan, India, Republic of Korea and the United Kingdom – see **Chart 4**. China, Japan and India alone accounted for more than 50 per cent of Australia's *Resources* exports.

Impact on Australia's terms of trade and Gross Domestic Income

The significant rise in the nominal value of *Resources* commodities has played a major part in the growth in Australia's terms of trade over the period 1999 to 2009 (through increased export prices), especially since 2003 – see **Charts 5 and 6**. The terms of trade has increased 64.4 per cent over the period 1999 to 2009. At its peak in 2008 it was at its highest level since the early 1950s. The strength of commodity prices has also supported the general appreciation of the Australian dollar over the period.

Work done by the Bank of Canada⁵ found that a commodity price boom has an indirect effect on the economy in the form of rising incomes through the terms of trade benefits. This can be seen by looking at Real Gross Domestic Income (GDI), rather than Real Gross Domestic Product (GDP) as it is adjusted for changes in purchasing power resulting from changes in the terms of trade. For the period September quarter 2003 to September quarter 2008 (before the Global Financial Crisis) Real GDI increased by 30.0 per cent compared to 17.3 per cent growth in Real GDP.

Chart 7 shows the ratio (or difference) of the relative growth rates of Real GDI to Real GDP for Australia based on a rolling five year period back to 1964. It shows that the ratio reached a peak of 1.74 and 1.75 in the September and December quarters 2008, at the peak of the commodity price boom. The increased domestic income from the mining boom comes through increased wages and profits in the mining sector which flow through to increased government revenue through royalties and taxation.

Impact of the Global Financial Crisis on Australia's exports of resources

The impact of the Global Financial Crisis offset the commodity price boom from the second half of 2008 as world demand fell for *Resources* resulting in a sharp decline in world commodity prices.

As a result of the Global Financial Crisis, Australia's exports of *Resources* fell \$21.8 billion or 14.3 per cent to \$130.8 billion in 2009. The fall was entirely due to reduced world commodity prices for *Resources* with export volumes actually rising by 1.6 per cent over the year. Falls were recorded for all broad *Resources* export categories with a particularly large fall in *Fuels*, down \$13.3 billion or 19.0 per cent to \$56.3 billion. According to

⁵ Source: Bank of Canada Review, Autumn 2009 – *Adjusting to the Commodity Price Boom: the Experience of Four Industrialized Countries*.

the Reserve Bank,⁶ the underlying dynamics of the resource boom are starting to now reappear with commodity prices expected to rise strongly to close to 2008 levels in 2010.

**Chart 7: Ratio of relative growth rates of
Real Gross Domestic Income and Gross Domestic Product
– based on five year rolling growth**

Source: ABS catalogue 5206.0

Outlook

The outlook for Australia's *Resources* exports is strong, based on research released by ABARE⁷ for the period out to 2015.

Supported by a recovery in commodity prices, Australia's *Resources* exports are forecast to rise 18.6 per cent to \$154.0 billion in the financial year 2010-11 compared to a forecast of \$129.9 billion in 2009-10.

Over the medium term, *Resources* exports in real terms are projected to rise to \$175.2 billion in 2014-15 (in 2009-10 prices) a rise of 34.9 per cent from 2009-10. The rise in real terms is mainly due to the significant investment in infrastructure and the mining sector over the past few years coming online.

The short term increase in commodity prices will again have a positive impact on the terms of trade with Department of Treasury⁸ expecting the rebound in the terms of trade to contribute 2.75 percentage points to nominal Gross Domestic Product in 2010-11. While in the medium term the increase in *Resources* export volumes will have a positive impact on Real Gross Domestic Product.

Australia's Coal and Iron ore exports 1999 to 2009

Coal and Iron ore have been important exports for Australia for some time. Over the past 10 years they have grown in importance, increasing nearly six-fold from \$12.0 billion in 1999 to \$69.4 billion in 2009. With strong world economic growth giving rise to higher commodity prices, Coal and Iron ore have dominated the growth in nominal exports over the period. These two commodities have grown at an average annual rate of 20.0 per cent per annum over this period compared to just 5.4 per cent per annum for all other exports. Their share in total exports has risen from 10.3 per cent in 1999 to 27.8 per cent in 2009.

Coal and Iron ore have been the driving force in the significant increase in Resources exports and thus to the growth in Australia's terms of trade.

North Asia is Australia's primary market for Coal and Iron ore. These commodities dominate trade with this region.

Overall trends in Coal exports

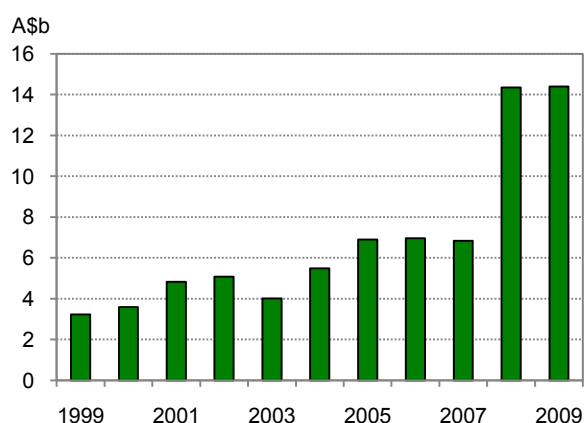

Australia's Coal exports largely comprise two ranks of coal – thermal and metallurgical – both being forms of bituminous coal. Thermal coal (the softer form of bituminous coal) is used in particular for electricity generation, whilst metallurgical coal (the harder form of bituminous coal) is used in the manufacture of steel. Metallurgical coal exports are almost twice as large as thermal coal exports.

The value of Australia's Coal exports has risen significantly in recent years, underpinned by strong growth in electricity generation (India and China) and world steel production.

The value of Australia's Coal exports over the past 10 years (1999 to 2009) has risen from \$8.4 billion in 1999 to \$39.4 billion in 2009, a rise of over 370 per cent.

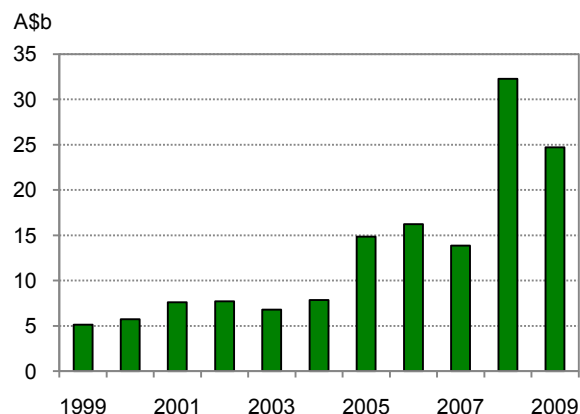

Within the overall Coal figures, both thermal and metallurgical coal have exhibited very strong growth over the period (see **Charts 1 and 2**). Thermal coal exports have risen from \$3.2 billion to \$14.4 billion (up nearly 350 per cent). Metallurgical coal exports rose from \$5.1 billion to \$24.7 billion (up just over 380 per cent), after surging to as high as \$32.3 billion in 2008.

Chart 1: Exports of thermal coal

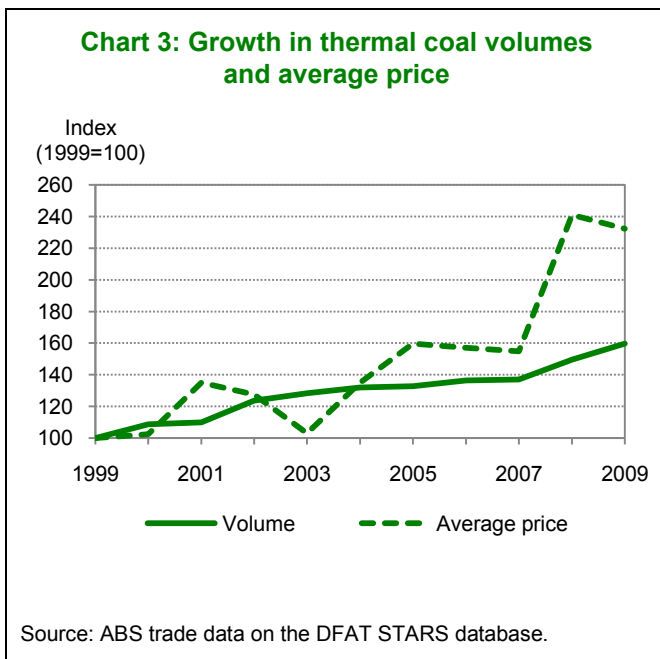

Source: ABS trade data on the DFAT STARS database.

Chart 2: Exports of metallurgical coal

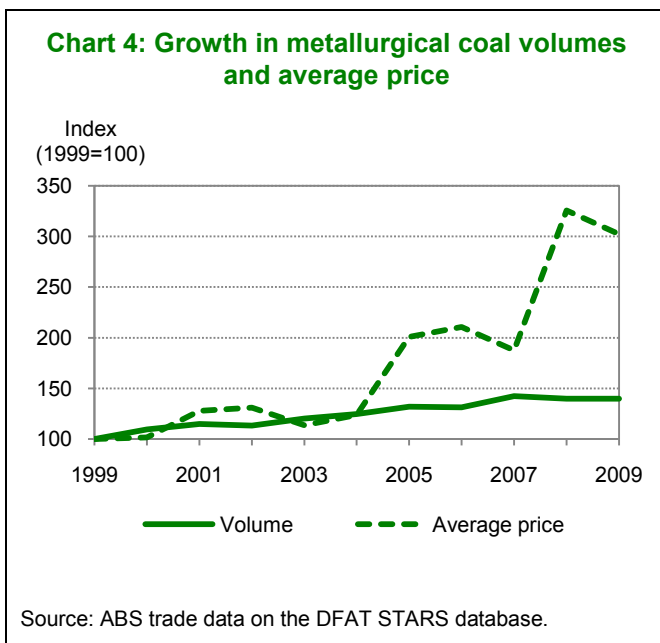

Source: ABS trade data on the DFAT STARS database.

Charts 3 and 4 show a disaggregation of the values of *Coal* exports into their price and volume components and display an index of change over the period 1999 to 2009.

- Thermal coal volumes have displayed steady growth over the period, up 76.7 per cent. And while the price of the commodity tracked quite closely with volumes to 2007, over the following two years the price tended to grow at a much stronger rate.
- Even after a decline at the end of the period, the price of thermal coal finished up nearly 160 per cent higher in 2009 relative to 1999. Hence those large increases in value shown in **Chart 1** are leveraged more to price than to volume.

- The price effect on metallurgical coal exports over the period 1999 to 2009 was even more pronounced than for thermal coal. It started tracking higher about half way through the period rather than just in the past two years.
- Although it too suffered a decline at the end of the period, the price for metallurgical coal finished at a point some 230 per cent higher than when the series started.
- The volume of metallurgical coal exports was 46.3 per cent higher in 2009 relative to 1999.

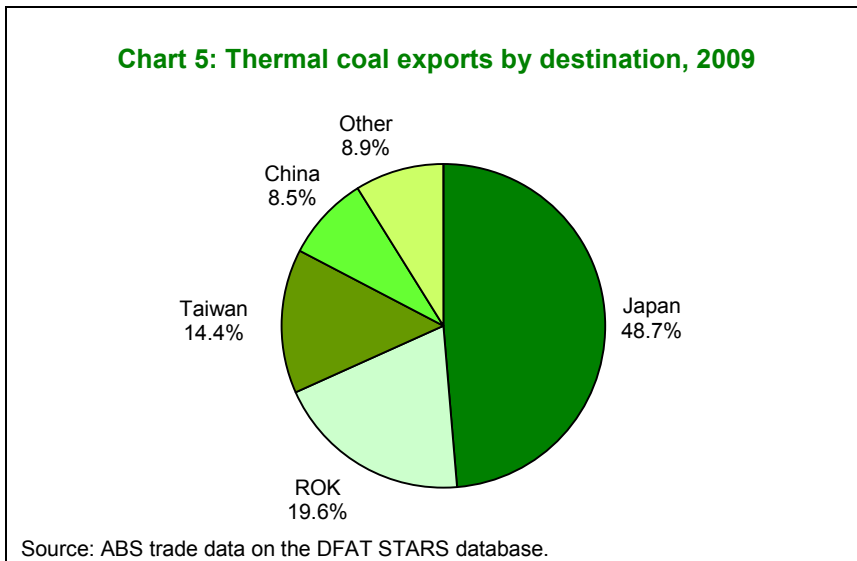

Major markets for Coal exports

Thermal coal

In 2009, the volume of world trade in thermal coal was estimated at 730.0 million tonnes⁹. Australia ranked as the world's second largest exporter, accounting for 19.0 per cent of that trade. Indonesia was first with 27.4 per cent and the Russian Federation was third, with 12.3 per cent.

⁹ Source: ABARE Australian commodities – March qtr 2010.

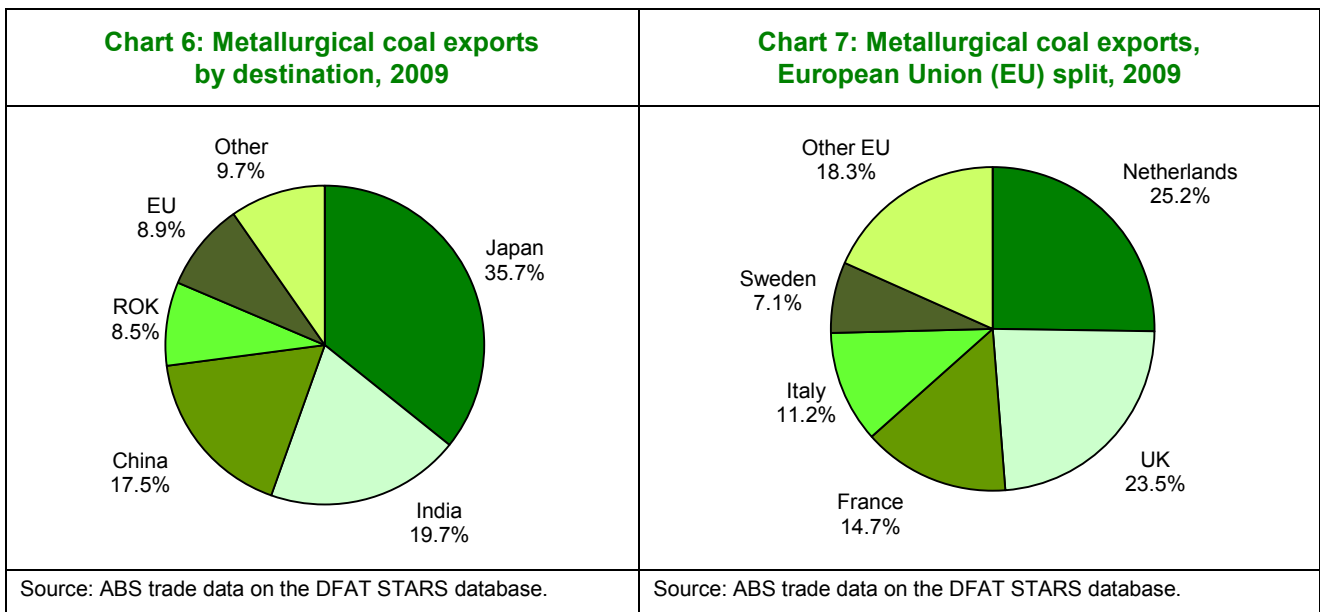

Accounting for nearly half the value of Australia’s thermal coal exports in 2009, Japan was the stand-out buyer (48.7 per cent), followed by the Republic of Korea (19.6 per cent) and Taiwan (14.4 per cent) – see **Chart 5**. Over the entire 1999 to 2009 period, Japan was the largest buyer of Australia’s thermal coal and it was only in 2009 that it accounted for less than half of the export value. At its peak during the period (2007), Japan accounted for 60.2 per cent of the value of Australia’s thermal coal exports.

Metallurgical coal

World trade in metallurgical coal in 2009 was estimated at 211 million tonnes¹⁰ (Mt) and Australia continued its rank as the number one exporter of this commodity, accounting for nearly two-thirds (64.0 per cent) of the total. The United States was next with 15.6 per cent.

Japan was Australia’s largest export market for metallurgical coal in 2009, accounting for just over a third (35.7 per cent) of the value. India was the second largest (19.7 per cent), followed by China (17.5 per cent) – see **Chart 6**. Japan’s share of Australia’s metallurgical coal exports remained fairly constant over the period, ranging from 39.6 per cent in 1999 to 33.3 per cent in 2004. China stood out as the growth market however, surging from 0.9 per cent of the value of exports in 2008 to 17.5 per cent in 2009 (\$296 million to \$4.3 billion).

¹⁰ Source: ABARE Australian commodities – March qtr 2010.

With \$2.2 billion worth of metallurgical coal exports in 2009, as a single market the EU (European Union) was Australia's fourth largest export market by value. Within the EU the top three destinations for Australian metallurgical coal were the Netherlands (25.2 per cent), the United Kingdom (23.5 per cent) and France (14.7 per cent) – see **Chart 7**.

Impact of the Global Financial Crisis on Australia's exports of Coal

The Global Financial Crisis affected exports of metallurgical coal more than exports of thermal coal; the latter, in value terms, were able to hold up relative to 2008. By comparison, metallurgical coal exports fell 23.4 per cent. When values are disaggregated into their price and volume components however, it can be seen that the impact of declining prices were either offset (thermal coal) or cushioned (metallurgical coal).

Between 2008 and 2009 the price of thermal coal eased from \$114 to \$104 per tonne, after rising strongly from \$61 per tonne in 2007. The impact of this decline was offset by a 10 per cent rise in volumes exported (from 126.4 Mt to 139.0 Mt). While volumes to China and Republic of Korea managed to grow quite strongly, these were partially offset by declines in Japan and the EU.

Prices received for metallurgical coal exports suffered a fall of over 23 per cent in 2009 relative to 2008. As volumes remained almost constant, this meant that the fall in the value of exports from one year to the next was price driven. Across key markets, China exhibited strong growth, while exports to Japan suffered a decline.

Future outlook

The outlook for exports of both thermal and metallurgical coal is strong, based on research released by ABARE¹¹ for the period out to 2015.

Supported by high prices, the volume of Australia's thermal coal exports is projected to grow by 5.5 per cent in 2010-11 followed by an average of 8.6 per cent per annum between 2011-12 and 2014-15 to 200 Mt. Prices are expected to ease a little over this period so export values may not keep up with volume growth. The growth in demand is expected to come from China and India, underpinned by rising electricity demand.

Underpinned by strong growth in demand for steel by China and to a lesser extent by India, Australian exports of metallurgical coal are projected to grow steadily for the period out to 2015. ABARE forecasts that the volume of Australian exports of metallurgical coal will increase by an average 4.9 per cent per annum between 2011 and 2015, to reach 304 Mt. Although prices are expected to continue to rise in 2010, beyond that the outlook is a little unclear. Should prices remain relatively steady, the value of metallurgical coal exports will change in line with volumes.

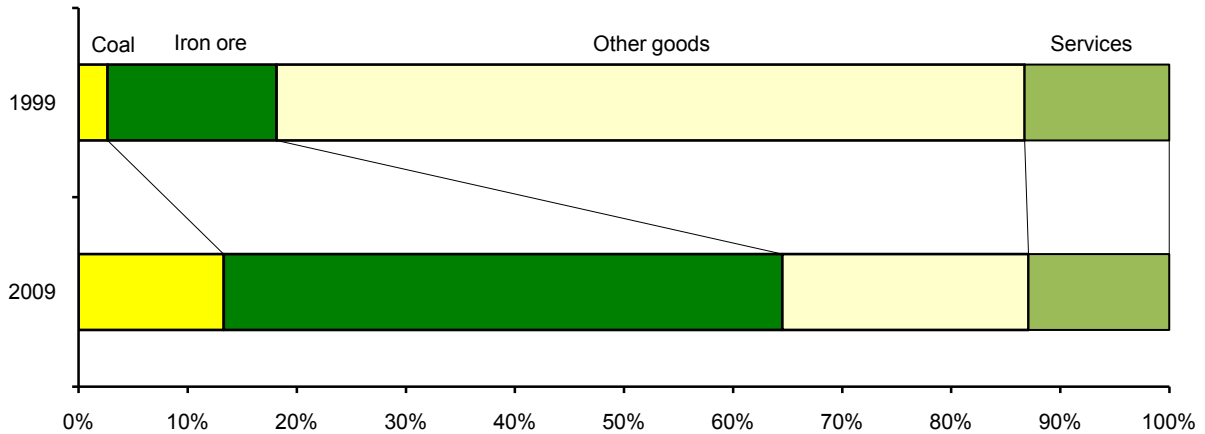

To facilitate continued growth in the volume of *Coal* exports the Australian economy must have sufficient enabling infrastructure. ABARE predicts that over the medium term at least, increased demand for Australian *Coal* will be supported by infrastructure upgrades. These include increased port and rail facilities, in New South Wales and Queensland.

¹¹ Source: ABARE Australian commodities – March qtr 2010.

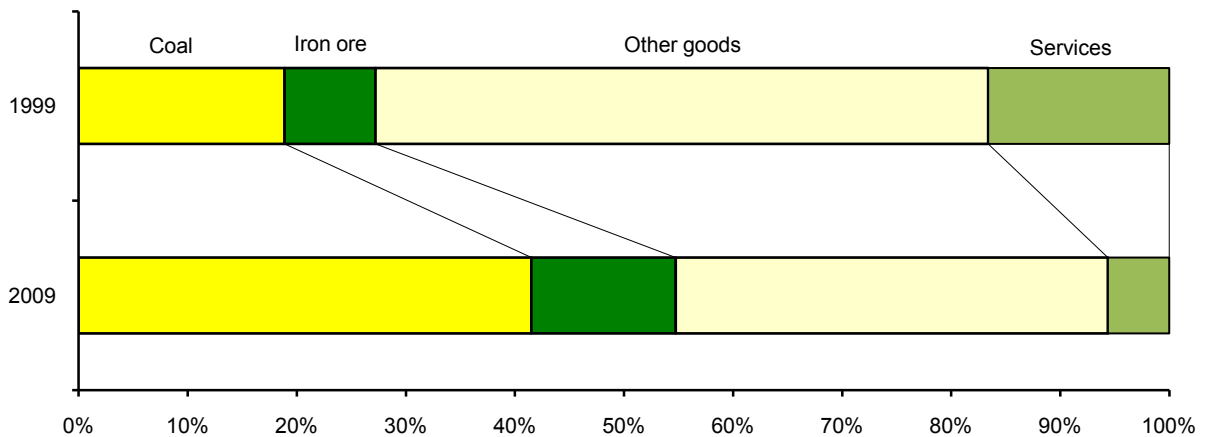

Change in composition of Australia's exports to its primary markets for Coal and Iron ore 1999 to 2009

The primary markets for Australia's exports of *Coal* and *Iron ore* were China, Japan and the Republic of Korea in 2009. Over the period 1999 to 2009 a significant shift in the composition of Australia's exports towards these products can be observed for these markets. In 2009, *Coal* exports were our largest exports to Japan and the Republic of Korea (*Coal* was our second largest export to China) while *Iron ore* exports were our largest export to China (*Iron ore* was our third largest export to Japan after *Natural gas* and our second largest export to the Republic of Korea).

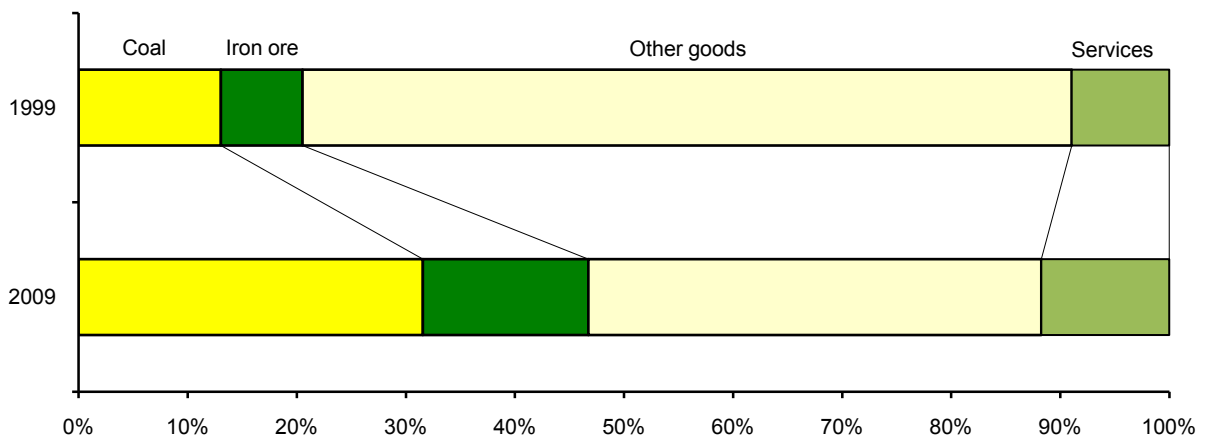

Composition of Australia's exports to China

Composition of Australia's exports to Japan

Composition of Australia's exports to the Republic of Korea

Sources: ABS trade data on the DFAT STARS database and ABS catalogue 5368.0 (March 2010).

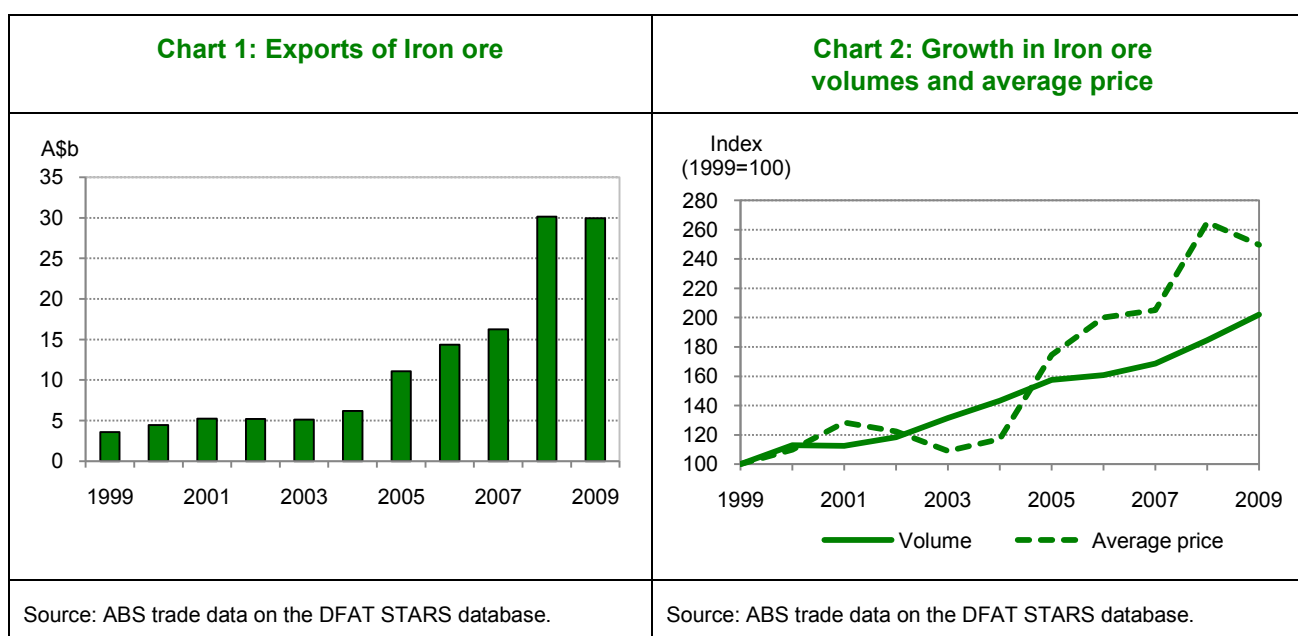

Overall trends in Iron ore exports

The value of Australia's exports of *Iron ore* have increased from \$3.6 billion in 1999 to \$30.0 billion in 2009 – see **Chart 1**. This represents average growth of 25.0 per cent per annum, compared with total Australian exports that grew by just 7.8 per cent on average per annum. As a result, the share of Australian exports accounted for by *Iron ore* exports rose from 3.1 per cent in 1999 to 12.0 per cent in 2009. *Iron ore* was ranked Australia's second largest export after *Coal* in 2009.

Australia is the world's largest exporter of *Iron ore* and accounted for around 40 per cent of world exports in 2009¹². The majority of Australian *Iron ore* exports are from Western Australia (97.0 per cent).

In volume terms, exports of *Iron ore* have increased from 139 million tonnes in 1999 to 362 Mt, representing average annual growth of 9.6 per cent per annum, while average prices received for a tonne of *Iron ore* have risen from \$26 in 1999 to \$83 in 2009.

The significant growth in *Iron ore* exports over the past five years was mainly due to increases in export prices, (2004 to 2009) – see **Chart 2**. The average price received for *Iron ore* grew 23.7 per cent on average per annum over the past five years on the back of the commodity boom compared with only 1.5 per cent in the first five years (1999 to 2004).

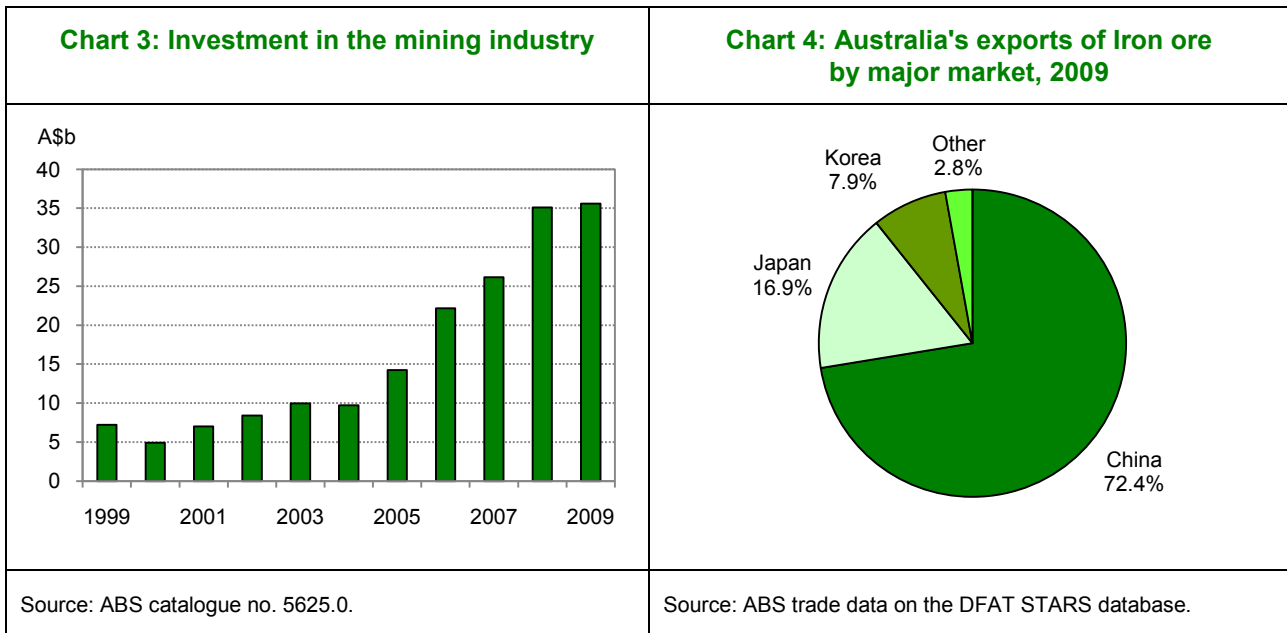

Growth in export volumes has been more steady over the 10 year period, with export volumes growing by 7.8 per cent on average per annum between 1999 and 2004 and then accelerating to 10.8 per cent in the past five years. The acceleration in export volumes in the past five years was due to Australian companies increasing output from existing iron ore mines (on the back of significantly increased world demand) in conjunction with increased investment in the mining industry which grew significantly, from \$9.7 billion in 2004 to \$35.6 billion in 2009 – see **Chart 3**.

Major markets for Australia's iron ore

Australia's major exports markets for *Iron ore* are China, Japan and the Republic of Korea. In total they accounted for 97.2 per cent of Australia's *Iron ore* exports in 2009 – see **Chart 4**. The only other significant market for *Iron ore* exports in 2009 was Taiwan, valued at \$799 million accounting for 2.7 per cent of total *Iron ore* exports.

¹² Source: ABARE Australian commodities – March qtr 2010.

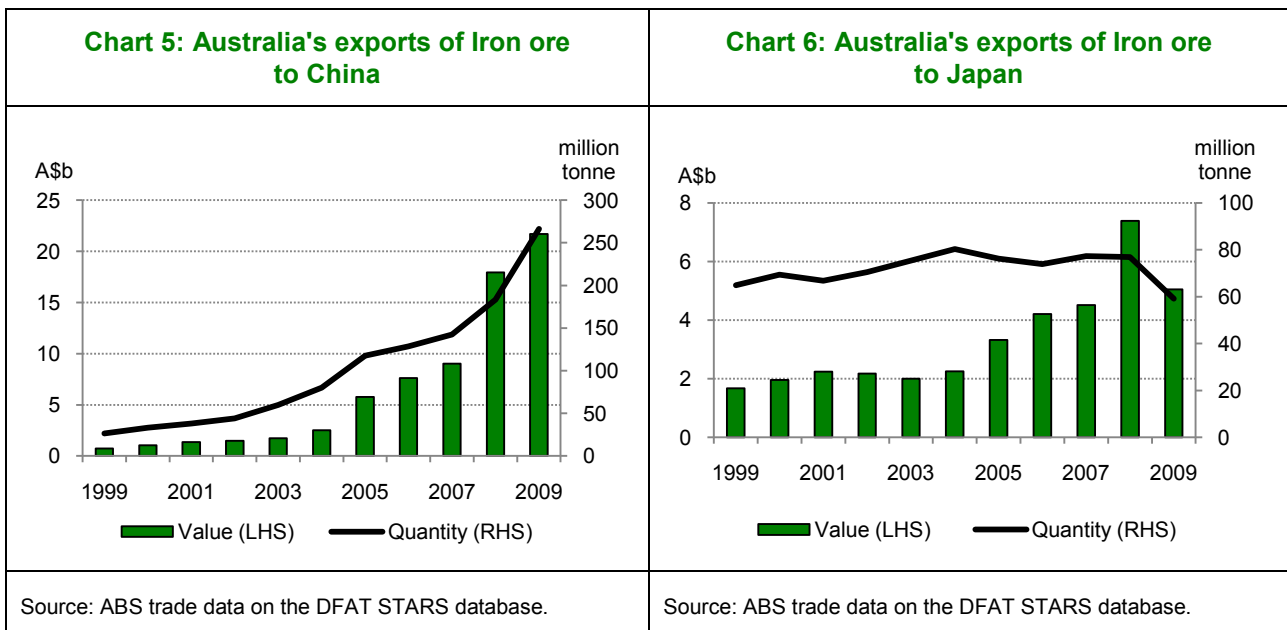

China was Australia's largest market for *Iron ore*, accounting for 72.4 per cent or \$21.7 billion in 2009 (and has been number one since 2004). Export values have increased by an average 41.8 per cent per annum since 1999, while export volumes have increased by 25.7 per cent on average – see **Chart 5**. The increase in demand for *Iron ore* by China is due to the large increase in Chinese steel production, which has risen from just over 120 Mt¹³ in 1999 to 568 Mt in 2009 and accounted for 46.6 per cent of world steel output¹⁴.

Over the past 10 years, Australia was the largest source of imports of *Iron ore* by China and accounted for 40.1 per cent of total China imports of *Iron ore* in 2009.

Japan was Australia's second largest market for Australian *Iron ore*, accounting for 16.9 per cent or \$5.0 billion in 2009. Export values have increased by an average 14.4 per cent per annum since 1999, while export volumes have increased by only 0.4 per cent on average – see **Chart 6**. Japan was Australia's largest market for *Iron ore* until 2003.

Over the past 10 years, Australia was the largest source of imports of *Iron ore* by Japan and accounted for 54.1 per cent of total Japanese imports of *Iron ore* in 2009.

¹³ World Steel Association – crude steel production data (www.worldsteel.org).

¹⁴ Source: ABARE Australian commodities – March qtr 2010.

The Republic of Korea was Australia's third largest market for *Iron ore*, accounting for 7.9 per cent or \$2.4 billion in 2009. Export values have increased on average by 18.0 per annum, while export volumes rose 4.2 per cent on average. Over the past 10 years Australia was the largest source of *Iron ore* imports for Korea.

Impact of the Global Financial Crisis on Australia's exports of Iron ore

The impact of the Global Financial Crisis and associated world recession seemed to have little impact on the value of Australia's exports of *Iron ore* in 2009, which fell only 0.6 per cent in value terms.

However the average price received for Australian *Iron ore* exports fell from its peak of \$138 per tonne in October 2008 to \$67 per tonne in December 2009. Even with this significant fall in prices in 2009, they were still well above longer term averages. Export volumes however rose a remarkable 17.1 per cent in 2009, offsetting most of the fall in price.

The impact of the world recession on the performance of Australia's leading *Iron ore* export markets was mixed. For Japan and the Republic of Korea, which both experienced recessions (particularly for Japan), Australian *Iron ore* export volumes plunged in 2009 as demand for world steel fell. Exports volumes to Japan fell by 23.1 per cent to 59 Mt, their lowest levels since 1996. Export volumes to the Republic of Korea fell by 16.3 per cent to 27.9 Mt, their lowest level since 2006.

Australian exports of *Iron ore* to China however, rose strongly, up 45.2 per cent in volume terms, to their highest level on record at 266 Mt. China now accounts for 73.5 per cent of Australia *Iron ore* export volumes compared to only 59.2 per cent in the previous year.

The strong volume growth in exports of *Iron ore* to China can be attributed to both the build up of stocks by China steel mills (taking advantage of lower world prices) as well as the increased domestic demand for steel (on the back of Chinese government infrastructure investment), which more than offset weaker demand for steel intensive exports.

Future outlook

According to ABARE¹⁵, Australian *Iron ore* exports in the medium term are projected to rise, in real terms, by 4 per cent per year to reach \$43 billion (in 2009-10 dollars) in fiscal year 2014-15. This growth will mainly be driven by increased growth in export volumes, with quantities of *Iron ore* projected to increase from 391 Mt in fiscal year 2009-10 to 547 Mt in 2014-15. *Iron ore* prices are forecast to rise more modestly from an average price of \$74 per tonne in 2009-10 to \$89 per tonne in 2014-15.

Changes in the ABS method to confidentialise merchandise imports and its impact on imports of aircraft & parts - 2009 update

Introduction

This article updates analysis on the impact of confidentiality in Australia Bureau of Statistics (ABS) international merchandise trade statistics on imports of aircraft and parts.

Changes to the way the ABS confidentialises some import data means that total import values for some countries will be lower than actual reported imports. This change has a flow on effect for the trade balances for these countries.

The ABS announced that it changed the method used in confidentialising data for merchandise imports from the month of September 2008 onwards. Import data commodities that have the confidentiality restrictions of "No commodity details" or "No value details" are now aggregated into a single confidential country code. **Attachment A** lists the commodities (in Harmonized Tariff Item Statistical Code (HTISC) and Standard International Trade Classification (SITC) codes) that are affected by this change¹.

For import data prior to September 2008, these data are added back into the appropriate country totals (i.e. these totals show the correct level of trade). From September 2008 the confidential data are not being added back into the appropriate country totals. Instead they are published as "No country details" in total Australian import data. This change ensures the confidentiality of ABS data is not breached.

Table 1 show that these commodities in aggregate represented \$2.0 billion or 0.9 per cent of total Australian merchandise imports in 2008 and \$5.5 billion or 2.7 per cent in 2009.

Table 1: Value of no-country details not included in country totals

Year	A\$m
2008	2,025
2009	5,491

Source: ABS trade data on DFAT STARS database.

Impact on imports of aircraft and related parts

Of the commodity codes affected by this change (see **Attachment A**), SITC code 792 - *Aircraft, spacecraft & related parts* would make up the most significant component.

By comparing ABS import data with partner country export data (e.g. France's exports to Australia), it is possible to obtain more details about Australia's imports of *Aircraft, spacecraft & related parts* for the periods not published by the ABS. This can then be matched to the reported ABS data for 2008 and 2009 to arrive at an estimate of the true value of *Aircraft, spacecraft & related parts* for these years. **Attachment B** lists all the HTISC codes at the 6-digit level that make up SITC 792 and which of those are confidential².

Based on ABS reported data only, imports of *Aircraft, spacecraft & related parts* (SITC 792) were valued at \$240 million in 2009. This data excludes large aircraft from September 2008 and helicopters, medium-size aircraft and parts of aircraft or helicopters from December 2008.

¹ The ABS publishes monthly, a list of all commodities with confidential restrictions in place in the publication, International Merchandise Trade: Confidential Commodities List (ABS catalogue 5372.0.55.0.01) available at the ABS website (www.abs.gov.au).

² The Australian HTISC classification is fully compatible with the international Harmonized System at the 6-digit level.

It should be noted that data as published by our major trading partners are not fully compatible with data published by the ABS. This is due to timing, coverage and valuation differences that will exist between the two data sets³.

Using partner country data for the periods excluded from ABS data, Australia imported an additional \$4.5 billion of *Aircraft, spacecraft & related parts* in 2009 (which accounted for around 80 per cent of the \$5.5 billion of confidential imports excluded from country import totals in 2009)⁴.

Table 2 details imports of *Aircraft, spacecraft & related parts* combining both sources of data. It shows that imports fell 20.6 per cent (or \$1.2 billion) to \$4.8 billion in 2009, making it Australia's 11th largest import (in terms of goods and services).

	2007	2008		2009 (prelim)			
	ABS	ABS	Partner country	Total	ABS	Partner country	Total
792 Aircraft, spacecraft & parts	2,990	4,159	1,850	6,009	240	4,530	4,770
<i>by major country:</i>							
Brazil	116	241	210	451	0	102	102
Canada	126	211	0	211	11	261	273
Germany	48	68	0	68	5	548	553
France	899	954	1,525	2,478	20	1,193	1,213
Switzerland	12	183	0	183	3	112	115
United States	1,469	2,204	115	2,319	152	1,951	2,103

Sources: ABS and UN merchandise trade data on DFAT STARS database & GTIS World Trade Atlas.

Impact on country imports and trade balances

Table 3 shows the impact of adding back the confidential *Aircraft, spacecraft & related parts* to the major countries affected. Imports from France, (and therefore the EU) and the United States related trade balances are both under reported, though the impact for Brazil for 2009 is fairly small.

³ A particular problem in using this type of analysis to estimate the imports of aircraft into Australia is to exclude imports of aircraft on an operational lease (which the ABS excludes for Australian import statistics). To try to overcome this issue the Civil Aviation Safety Authority – civil aircraft register has been used to try and identify imports of leased aircraft so as to exclude these aircraft in partner country export data.

⁴ In 2009 both the United Kingdom and the United States confidentialised aircraft exports to a degree. For the United States the lower level of confidentiality still enabled the analysis of United States export data and ABS import data to produce an estimate of the value of imports of aircraft from the United States. However the higher degree of confidentiality in the United Kingdom export statistics prevented the estimation of aircraft imports from the United Kingdom. As a result the estimation of Australian aircraft imports from 2009 onwards excludes imports from the United Kingdom.

Table 3: Impact on imports and trade balances for Brazil, France, EU27 and the United States (A\$ million)

Commodities affected by the change in confidentiality restrictions (cont'd)

HTISC	SITC-REV4	Date of Effect	Date of Cessation	Restriction applied	Commodity Description
7208390038	673.21	Aug-09		No Commodity Details	Products of iron or non-alloy steel, other, in coils, not further worked than hot-rolled, of a width of 600mm or more, of a thickness of less than 3mm
7208400039	673.24	Aug-09		No Commodity Details	Flat-rolled products of iron or non-alloy steel, not in coils, not further worked than hot-rolled, of a width of 600mm or more, with patterns in relief
7208530042	673.24	Aug-09		No Commodity Details	Flat-rolled products of iron or non-alloy steel, of a width of 600mm or more, not in coils, not further worked than hot-rolled, of a thickness of 3 mm or more but less than 4.75mm
7208540043	673.24	Aug-09		No Commodity Details	Flat-rolled products of iron or non-alloy steel, of a width of 600mm or more, not in coils, not further worked than hot-rolled, of a thickness of less than 3mm
7210490055	674.13	Aug-09		No Commodity Details	Flat-rolled products of iron or non-alloy steel plated or coated with zinc, of width of 600mm or more, of a thickness of less than 0.5mm (excl electrolytically plated or coated or corrugated)
7210490058	674.13	Sep-08		No Commodity Details	Flat-rolled products of iron or non-alloy steel electrolytically plated or coated with zinc, of width of 600mm or more, of a thickness of 2.5mm or more (excl electrolytically plated or coated or corrugated)
7210610062	674.43	Aug-09		No Commodity Details	Flat-rolled products of iron or non-alloy steel plated or coated with aluminum-zinc alloys, of width of 600mm or more, of a thickness of 1.5mm or more
7211130039	673.27	Aug-09		No Commodity Details	Iron or non-alloy steel, not further worked than hot-rolled, width less than 600mm, rolled on four faces or in a closed box pass, of a width exceeding 150mm and a thickness of not less than 4mm, not in coils and without patterns in relief
7211190041	673.29	Aug-09		No Commodity Details	Iron or non-alloy steel, not further worked than hot-rolled, width less than 600mm, other (excl others, of a thickness of 4.75mm or more & rolled on four faces or in a closed box pass, of a width exc. 150mm and a thickness of not less 4mm)
7213910044	676.19	May-09		No Commodity Details	Bars & rods of iron/non-alloy steel, of circular cross section <14mm diameter, hot-rolled, in irregularly wound coils (excl those of free-cutting steel & those with indentations, ribs, grooves etc produced during rolling)
7216310030	676.82	Sep-08		No Commodity Details	U sections of iron or non-alloy steel, not further worked than hot-rolled, hot-drawn or extruded, of a height of 80mm or more
7216320031	676.82	Sep-08	Jul-09	No Commodity Details	I sections of iron or non-alloy steel, not further worked than hot-rolled, hot-drawn or extruded, of a height of 80mm or more
7216330032	676.82	Sep-08	Aug-09	No Commodity Details	H sections of iron or non-alloy steel, not further worked than hot-rolled, hot-drawn or extruded, of a height of 80mm or more
7216400033	676.82	Sep-08	Jul-09	No Commodity Details	L or T sections of iron or non-alloy steel, not further worked than hot-rolled, hot-drawn or extruded, of a height of 80mm or more

Commodities affected by the change in confidentiality restrictions (cont'd)

HTISC	SITC-REV4	Date of Effect	Date of Cessation	Restriction applied	Commodity Description
7216500056	676.83	Aug-09		No Commodity Details	Iron or non-alloy steel, angles, shapes and sections (excl U, I, H, L and t sections) not further worked than hot-rolled, hot-drawn or extruded
7301100001	676.86	Sep-08		No Value Details	Sheet piling of iron or steel, whether or not drilled, punched or made from assembled elements
7303000043	679.11	Jan-10		No Commodity Details	Tubes, pipes and hollow profiles of cast iron
7306690027	679.44	Aug-09		No Commodity Details	Welded tubes, pipes and hollow profiles nes, of non-circular cross-section, of iron or non-alloy steel, not exc 279.4mm perimeter with a wall thickness exc 2mm
7306690028	679.44	Aug-09		No Commodity Details	Welded tubes, pipes and hollow profiles nes, of non-circular cross-section, of iron or non-alloy steel, exc 279.4mm but not exc 1277.3mm perimeter
7606120033	684.23	Sep-08		No Commodity Details	Alloyed rectangular (incl. square) aluminium plates, sheets and strip (excl of a kind used in the manufacture of venetian blinds), coiled, exc 1,500mm in width, exc 0.2mm but not exc 3mm in thickness
8418210010	775.21	Jul-09		No Commodity Details	Compression-type, household type refrigerators 200 L and over but less than 300 L gross internal capacity
8429400029	723.33	Jul-09		No Commodity Details	Self-propelled tamping machines and road rollers
8519813032	763.39	Oct-09		No Commodity Details	Cassette type dictating machines capable of operating without an external source of power
8544492040	773.16	Sep-08		No Commodity Details	Electric conductors not fitted with connectors, insulated with cross-linked polyethylene (XLPE) materials, for a voltage exc 80V but not exc 1,000V
8544601009	773.17	Dec-08		No Commodity Details	Insulated electric conductors designed for working pressures exceeding 33 kV, for a voltage exceeding 1,000V
8544609020	773.17	Sep-08		No Commodity Details	Electric conductors designed for working pressures exceeding 11,000V but not exceeding 33,000V, not fitted with connectors, insulated with cross-linked polyethylene (XLPE) materials, for a voltage exceeding 1,000V
8544609056	773.17	Dec-08		No Commodity Details	Elec conductors, for a voltage exc 1,000V, designed for working pressures exc 1,000V but not exc 11,000V, not fitted with connectors
8701200003	783.20	Dec-08		No Commodity Details	Assembled road tractors for semi-trailers (excl those presented with their trailers or semi-trailers and, when combined, have a g.v.w. of 10.16T or more)
8705100010	782.21	Dec-08		No Commodity Details	Assembled crane lorries
8802110003	792.11	Dec-08		No Commodity Details	Helicopters of an unladen weight not exc 2,000kg
8802120004	792.15	Dec-08		No Commodity Details	Helicopters of an unladen weight exc 2,000kg
8802300006	792.30	Dec-08		No Commodity Details	Aeroplanes and other aircraft (excl helicopters) of an unladen weight exc 2,000kg but not exc 15,000kg
8802400007	792.40	Sep-08		No Commodity Details	Aeroplanes and other aircraft (excl helicopters) of an unladen weight exc 15,000kg
8803300012	792.95	Dec-08		No Commodity Details	Parts of aeroplanes or helicopters (excl propellers, rotors and under-carriages and parts thereof)
8901909035	793.27	Dec-08		No Commodity Details	Other vessels for the transport of goods or persons and goods (excl ferry boats, tankers and refrigerated vessels) exc 150 gross construction tons, imported as self transported goods (ie under own power)

Attachment B

List of all HTISC codes that make up SITC 792 – Aircraft, spacecraft & parts

SITC 792 – Aircraft, spacecraft & parts

Confidential codes

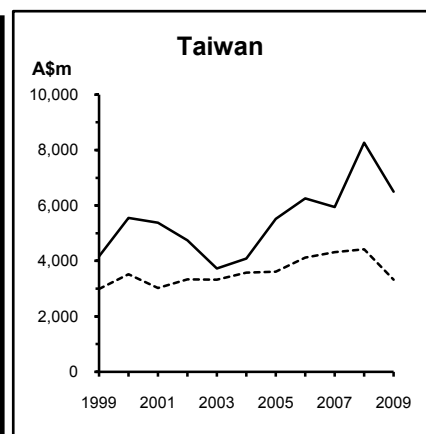

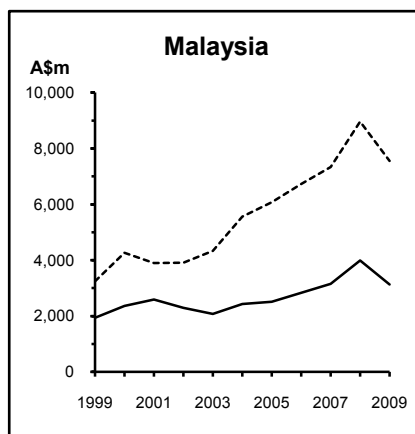

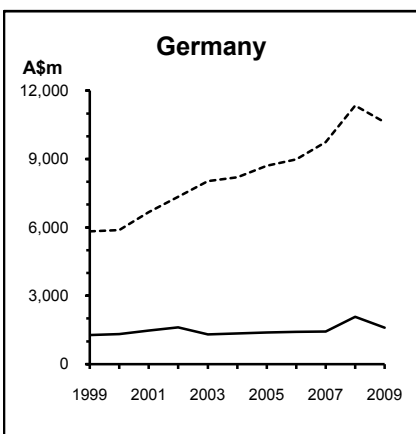

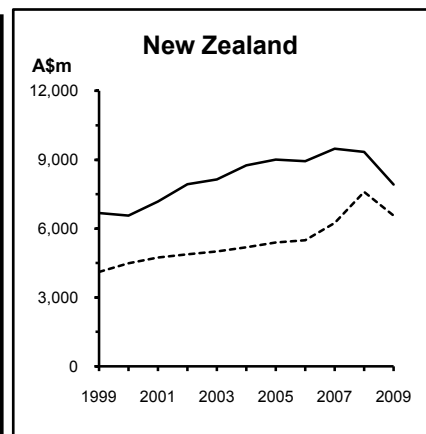

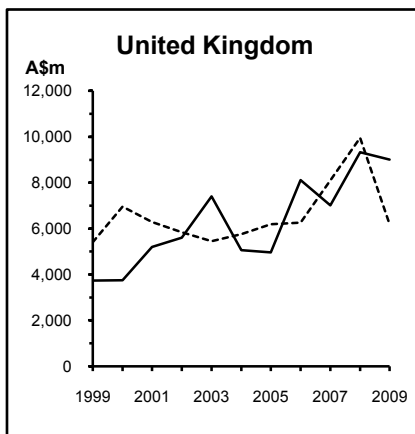

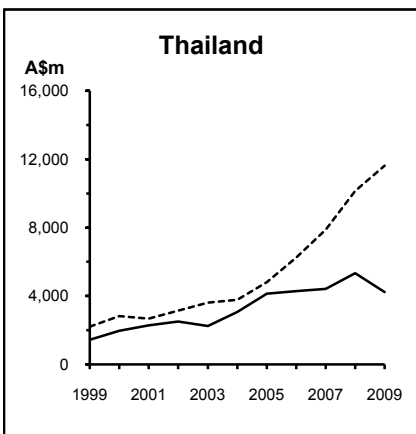

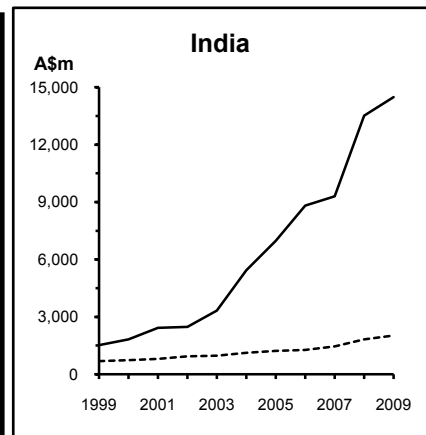

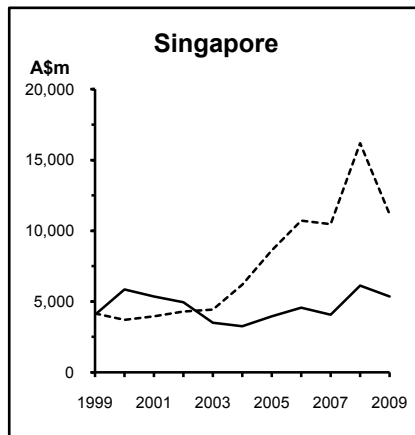

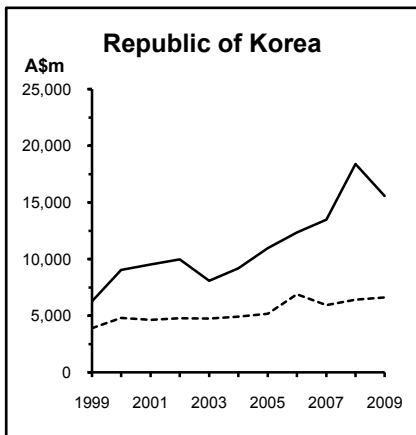

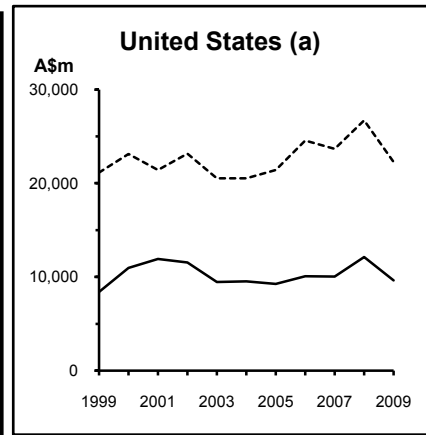

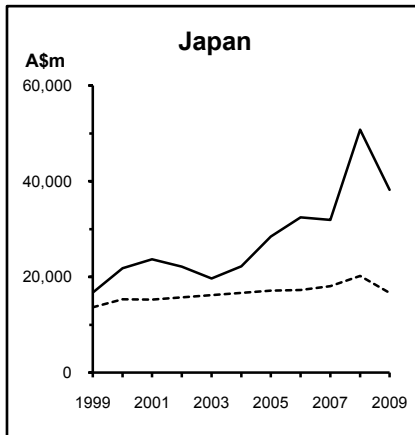

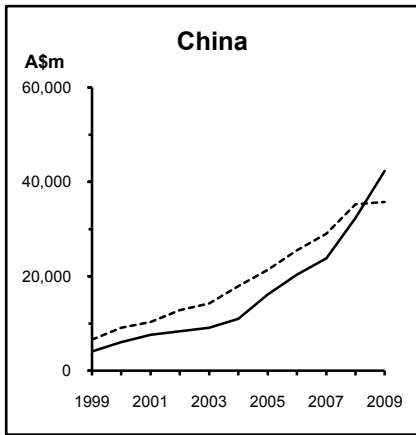

HTISC	From	Description
8802.11	Dec-08	Helicopters of an unladen weight not exc 2,000 kg
8802.12	Dec-08	Helicopters of an unladen weight exc 2,000 kg
8802.30	Dec-08	Aeroplanes and other aircraft (excl helicopters) of an unladen weight exc 2,000 kg but not exc 15,000 kg
8802.40	Sep-08	Aeroplanes and other aircraft (excl helicopters) of an unladen weight exc 15,000 kg
8803.30	Dec-08	Parts of aeroplanes or helicopters (excl propellers, rotors and under-carriages and parts thereof)

Non-confidential codes

HTISC		Description
8802.20		Aeroplanes and other aircraft (excl helicopters) of an unladen weight not exc 2,000 kg
8802.60		Spacecraft
8801.00		Balloons and dirigibles, gliders and other non-powered aircraft
8803.10		Propellers and rotor parts
8803.20		Undercarriages and parts
8803.90		Other

Australia's merchandise trade with major trading partners

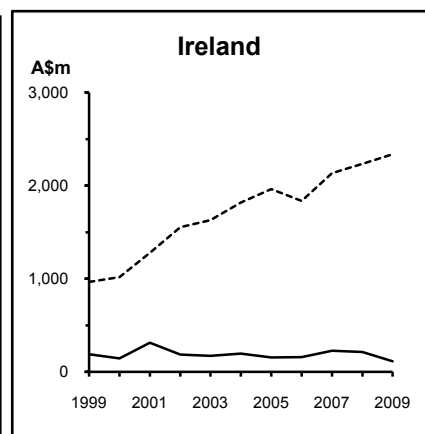

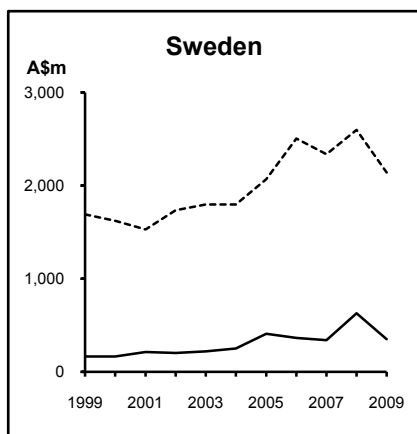

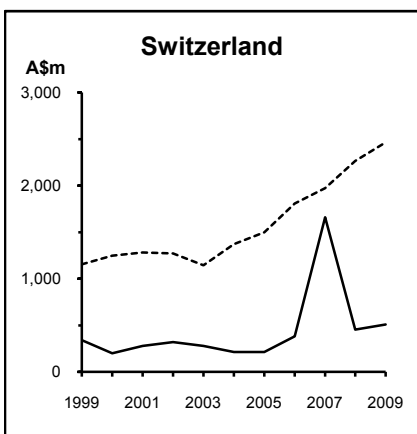

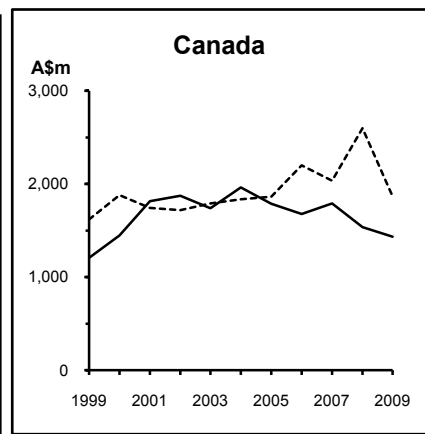

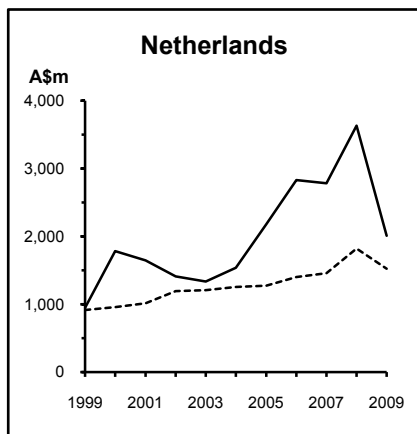

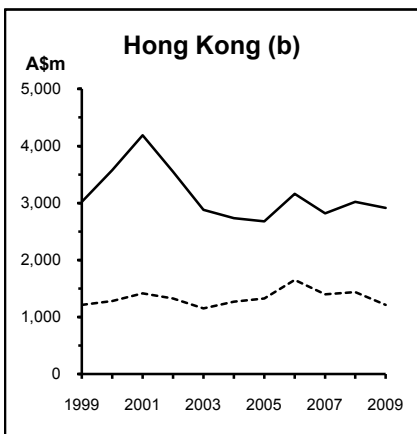

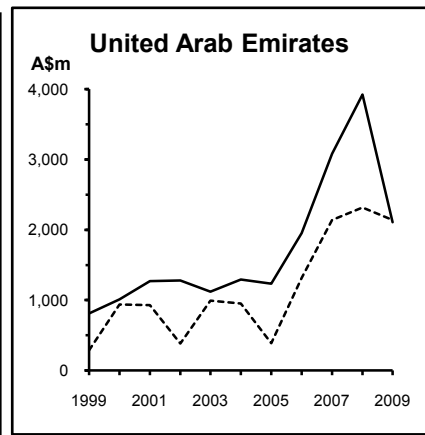

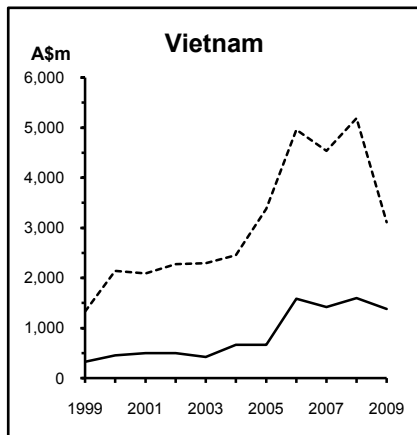

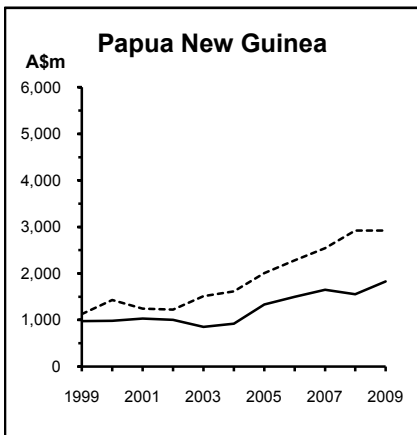

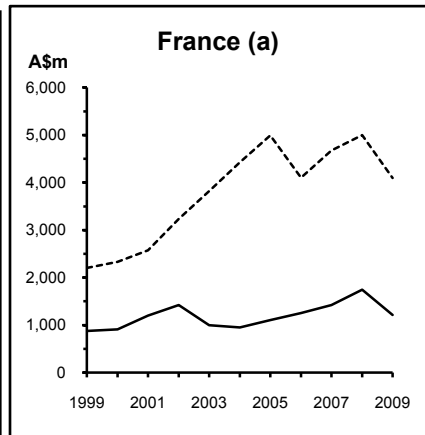

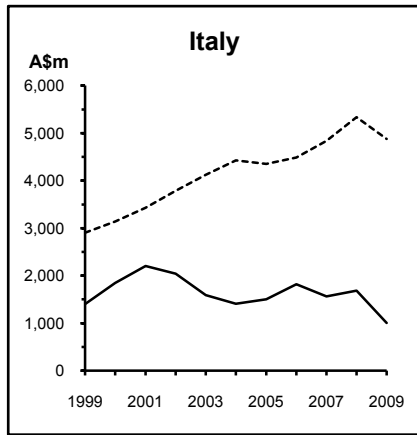

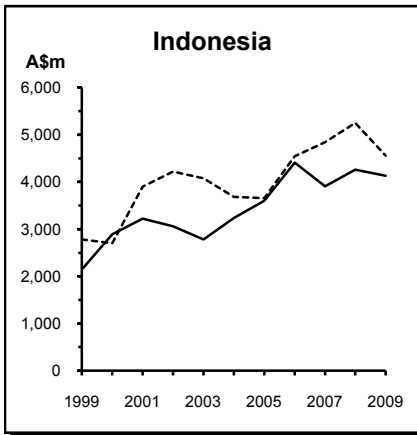

— Exports - - - - Imports

(a) Excludes imports of large aircraft from September 2008 onwards.

Australia's merchandise trade with major trading partners

———— Exports - - - - - Imports

(a) Excludes imports of large aircraft from September 2008 onwards. (b) Special Administrative Region of China.

(a) Ranked on latest year. (b) For Australia's bulk wheat exports, the ABS does not publish the value of wheat exports by country. However the quantity of wheat exports by country is published. Bulk wheat has become unconfidentialised from April 2009 onwards. See explanatory notes for more details. (c) Country data published by the ABS, after a six month lag. See explanatory notes for more details.

(a) Cells in this table may have been perturbed to protect confidentiality. (b) The ABS only publishes a breakdown of services trade by 34 countries, and therefore a significant component is classified to 'other' countries. If the 'other' countries component could be classified by country it would affect the rankings listed above, especially for the lower ranked countries.

(c) Includes confidential countries.

Technical appendices

Appendix A Explanatory notes

Introduction

Composition of Trade 2009 provides details of Australia's merchandise and services trade, export markets, and sources of imports for the years 2007 to 2009 and in selected tables from 2004.

This publication is divided into seven sections. Section 1 provides data on Australia's trade in goods and services showing commodity and country values and ranking in the latest year. Section 2 shows Australia's composition of merchandise trade by broad category, commodity ranking, value and growth. Section 3 provides Australia's composition of services trade by type of activity. Section 4 lists merchandise trade with each of Australia's trading partners, including net exports, total trade and ranking in the latest year. Section 5 shows Australia's direction of services trade by country and selected regions. Section 6 provides a detailed commodity breakdown of Australia's merchandise trade with Country Groups (e.g. APEC, ASEAN). Section 7 gives similar details for Australia's major merchandise trading partners (those where Australia's total trade exceeded \$50 million in 2009) – see note below.

Revisions to data

The merchandise trade statistics used to compile this publication are derived by the Australian Bureau of Statistics (ABS) from information provided to the Australian Customs and Border Protection Service by exporters and importers. ABS editing procedures frequently lead to revisions of previously published trade data and may occur for up to seven months after the reference period. Most of these revisions occur in the first month after the reference period.

DFAT uses trade data published two months after the reference period as a close proxy for final trade data for this period. For the 2009 calendar reference year, ABS monthly merchandise trade data as at January 2010 have been used (except for Sections 1, 3 and 5 – see note below).

This allows DFAT to release its' trade publications (and associated country/economic fact sheets) in a more timely fashion, and on a more consistent basis, than awaiting the release of the final trade data for 2009, seven months after the reference period. The minor revisions to the current reference period published after this point will be incorporated in the next calendar year issue of this publication.

Sections 1, 3 and 5

The trade data in Sections 1, 3, and 5 were sourced from *International Trade in Goods and Services, Australia*, March 2010 (ABS catalogue 5368.0), while the chain volume and price index data has been sourced from the *Balance of Payments and International Investment Position Australia*, December quarter 2009 (ABS catalogue 5302.0).

As a result there will be small differences in country and commodity totals published in these sections compared with those in the rest of the publication.

Series break in Gold exports data

Because of a change in the treatment of *Gold* imported into Australia for processing and subsequent re-export, there is a series break in the *Gold* merchandise trade series between 2006 and 2007. Users need to be careful when interpreting movements between the two years. For more information please refer to the article 'Gold exports: Impact of ABS revised treatments for goods for processing in ABS merchandise trade'. This article appeared as [Appendix E in the 2008](#) edition of this publication.

Confidential data

To avoid divulging commercially-sensitive details of individual firms, the ABS restricts release of statistics on certain commodities. Such details are aggregated into a 'dump' item (code 988) in most tables. Appendix D lists the restrictions applied to confidential export items and the countries most affected. It is worth noting that commodities are frequently added to the confidential list, e.g. as sugar was in January 1998. In such cases the value shown for trade in aggregates containing these items will show a decrease.

The total value will be correct for exports or imports with a particular country, except for total exports to Egypt, Iceland and Bahrain (from March 1992) which exclude alumina. These exports are coded to a 'confidential country' category and cannot be separately identified. As a result, the values of exports to these countries are understated in aggregate by the following amounts: \$366 million in 2004; \$630 million in 2005; \$785 million in 2006; \$788 million in 2007; \$1.1 billion in 2008; and \$502 million in 2009.

Country import totals for all countries that Australia imports aircraft from will exclude some aircraft from September 2008 onwards (refer to the section on aircraft imports for more details).

Bulk wheat exports by partner country

The value of bulk wheat exports by partner country has been confidential in ABS merchandise trade statistics and was included in confidential item 988, however the quantity data by partner was published. Table 18 shows Australia's exports of wheat in tonnes (including the confidential bulk wheat component) by country and will give the reader a guide to Australia's major wheat markets.

From April 2009, the ABS removed this restriction for bulk wheat exports. **Users should be particularly careful in interpreting movements in wheat exports values by partner country between 2008 and 2009** as the reported value of wheat exports will include bulk wheat from April 2009 onwards.

Raw sugar exports by partner country

The value of raw sugar by partner country is only released by the ABS after a six month lag. However, they are not incorporated into ABS merchandise trade data and are only published separately. Table 19 shows the value of Australia's raw sugar exports by country for the latest period available.

Barley exports by partner country

The value of barley exports by partner country is also only released by the ABS after a six month lag. Unlike raw sugar exports, the data is automatically incorporated into the ABS merchandise trade data after this period. In this publication, barley exports for 2009 include only exports up to July 2009. Exports of barley for the period August to December 2009 are included in confidential items.

Aircraft imports

The ABS changed the way it confidentialised import data from September 2008 onwards. This change particularly impacted on the treatment of imports of aircraft in ABS merchandise trade statistics.

Country import totals for all countries that Australia imports aircraft from will exclude large and medium sized aircraft from September 2008 onwards. This has the most impact on ABS import data for France (and therefore the EU) and the United States, which are Australia's major suppliers of large and medium size aircraft.

For more details regarding the impact of these changes please refer to the article on *Changes in the ABS method to confidentialise merchandise imports and its impact on imports of aircraft & parts* at the front of this publication. This article will be updated with the release of each edition of this publication.

Commodity classification

Recorded Trade basis vs BOP basis

The data on merchandise trade in this publication are measured on a recorded trade basis, based upon quantities and values of goods measured as they cross the Australian Customs frontier. They can differ from data presented under the BOP basis in terms of coverage, valuation and timing.

In this publication, trade is disaggregated by two classifications: the merchandise Trade Exports Classification (TREC); and the Standard International Trade Classification, Revision 4 (SITCr4).

TREC was developed by the Department of Foreign Affairs and Trade to group exports according to their level of processing. The broad levels of the TREC are:

- *Primary products*;
- *Manufactures*, divided into *simply transformed* and *elaborately transformed*; and
- *Other goods* (mainly gold and confidential items).

More detailed statistics of exports classified by TREC are presented in our publication '*Exports of Primary and Manufactured Products*' (latest edition 2008-09, with the 2009 edition due for release in June 2010).

Data in this publication which have been classified according to SITCr4 are shown at the Group (3-digit) level. There are 264 categories at this level.

Services

Australia's BOP defines services as comprising services provided between Australian residents and non-residents, together with some transactions in goods where, by international agreement, it is not practical to separate the goods and services components (e.g. goods purchased by travellers are classified to services).

Services delivered to non-residents through a foreign branch or subsidiary, for example, services rendered to an Asian company by a branch office of an Australian legal firm in Bangkok, are not defined as a BOP transaction. But services delivered by a parent company to a foreign-resident subsidiary are defined as international services. Any profits or dividends remitted between an enterprise in Australia and a related enterprise abroad are regarded as an income transaction, not as a service in Australia's BOP.

Australia's BOP statistics are compiled in accordance with the latest international standards determined by the International Monetary Fund, and published in *Balance of Payments Manual*, Sixth edition, 2008 (BPM6).

The ABS Extended Balance of Payments services classification (EBOP) is based on the UN publication *Manual on Statistics of International Trade in Services*. This is an extended services classification that is fully compatible with the BPM6.

In this classification, services commodities are broken down into 12 major groups: Manufacturing services on physical inputs owned by others; Maintenance and repair; Transport; Travel; Construction; Insurance & pension; Financial; Charges for the use of intellectual property; Telecommunication, computer & information; Other business; Personal, cultural & recreational; and Government services and around 60 detail services commodities.

Ranking of goods and services

See **Appendix E**.

Composition of merchandise trade reports

The composition of merchandise trade reports (Sections 6 and 7 in this publication) produces a summary of Australia's trade with a particular country or region. The reports show export and import data and is designed to provide a summary where major items are shown in more detail (SITC 3-digit level) while items of minor trade for that country are aggregated at a broader level (SITC 2- or 1-digit).

For the latest reference year, the threshold for major exports is 5 per cent of total exports and for imports it is 7 per cent of total imports.

For example, if one chemical item (in SITC section 5) was picked up as a major export/import for a report and the rest did not individually meet the criteria—but were large in aggregate—they would be reported as “5* Other chemicals” with the single individual major item shown separately (e.g. “515 Organo-inorganic compounds”). The “*” in the “5*” signifies that the data is an aggregation of all SITC items in section 5 that have not been reported separately.

Valuation

Merchandise trade

Exports: Valued at the *free-on-board* (f.o.b.) basis at the Australian port-of-shipment. Charges for distributive services provided beyond the customs frontier are not included (e.g. international freight and insurance charges).

Imports: Valued at the *Australian Customs Value* for Australian data. This is based on the price actually paid, provided the buyer and seller are independent, on a f.o.b. basis, i.e. charges and expenses involved in delivering the goods from the place of exportation to Australia are excluded.

Services trade

Services statistics are based on market price for both credit (export) and debit (import) entries. This is in accordance with the latest international standards determined by the International Monetary Fund and published in the BPM6.

Country

Although not members of APEC, Puerto Rico and the US Virgin Islands have been included in the APEC United States' total as they are regarded by the United States as part of its customs zone. When the United States reports its total exports it includes exports from these two self governing territories. This change was made to make Australian and United States data more consistent.

For exports, 'country' refers to the final destination as reported by exporters. It is known, however, that exporters may not know the country of final destination of their goods at the time they are shipped. This applies particularly to goods directed through entrepôts such as Singapore, Hong Kong (SAR of China), and major European ports, with a consequent overstating of Australia's exports to these countries and corresponding understatement of exports to countries 'down stream' from them. For imports, 'country' refers to the country of origin of the goods, which is defined as the country of production for Customs purposes.

ABS Chain volume measures

Estimates of 'real' growth are compiled by the ABS, using chain volume measures. Chain volume measures are derived by deflating the original current price series by specifically compiled measures of price change. The reference year for chain volume measures is the year prior to the latest complete financial year incorporated into the publication. The reference year is updated with the completion of estimates for each financial year.

Prior to the reference year, chain volume measures are not additive, in that the component chain volume measures of an aggregate will not add through to the chain volume measure of the total aggregate. For further information on chain volume measures refer to the ABS publication: *Information paper, Australian National Accounts, Introduction of Chain Volume and Price Indexes* (catalogue 5248.0).

Implicit price deflator (IPD)

The IPDs used in this publication are derived by dividing current price series by the corresponding chain volume measure.

Terms of trade

In this publication the terms of trade is based on the ABS definition. It is measured using the following index:

IPD for the export (credit) item divided by the IPD for the import (debit) item, multiplied by 100.

Trend growth rates

Trend growth is derived by log-linear regression using the least squares method. It is a more robust measure than the 'average' annual growth as it takes account of all observations and, as such, is less likely to be affected by the end points of a given period.

Total trade

Total trade is the sum of exports and imports. This is a useful measurement of the overall trading relationship between Australia and its trading partners. Total trade data is useful in ranking Australia's major trading partners, without a bias towards ranking only the larger export markets, or the larger import sources.

This publication was compiled mainly by Julie-Anne Andrew, Vicky Tooke, Jane Monico, Frank Bingham and Brent Perkins.

If you want to know more about these statistics or about other trade and economic publications produced by DFAT, please contact Julie-Anne Andrew on telephone (02) 6261 3047, facsimile (02) 6261 3321, or by email to StatsSection@dfat.gov.au.

For more information on the articles please contact Frank Bingham on telephone (02) 6261 2271, facsimile (02) 6261 3321, or Brent Perkins on telephone (02) 6261 3712, facsimile (02) 6261 3321

Appendix D Confidential exports

The system used by the ABS for confidentialising foreign trade statistics is designed to maximise the release of data, without divulging details of any single firm's operations. A complex range of confidentiality provisions are applied to the data. Those of most relevance in this publication are:

- A. No details** No data for a particular commodity item is separately released. For example, the total value of non-industrial diamonds exports is only included in the confidential item dump code of 988 for all countries and world total.
- B. No country details** Total exports of a particular commodity are available, but not for individual countries. For example, the value of liquefied natural gas exports to each country is suppressed, but the world total is available.
- C. Selected country details** Exports of a particular commodity to some countries are suppressed, but the value of exports to other countries, and the world total is available.

The following table lists details of confidential commodity items that can be identified separately in the SITCr4 classification:

SITC Code	Description	Restriction Type	Period
034.28	Other frozen fish (specifically tooth fish)	A,B	from Oct 2003
041.1	Unmilled durum wheat	B, C	from Jul 1988
041.2	Unmilled wheat and meslin	B, C	from Dec 1991
042	Rice (selected varieties)	A, B	Various
043	Unmilled barley	B	latest 6 months only
045.2	Unmilled oats	B	from Jul 1993
057.79	Edible nuts nes (specifically macadamia nuts)	B	From Mar 2000
061.11	Sugar (raw cane)	A	available on a quarterly basis after a 6 month lag
081.13	Lupins (incl feed for animals during a voyage)	A	latest 6 months only
081.99	Prepared stock feeds and preparations of a kind used in animal feeding nes	C	from Apr 2001
112.3	Beer made from malt	A,B	Various
268.11	Wool, greasy shorn	C	from Apr 2007
268.21	Other wool degreased	C	from Apr 2007
268.29	Other wool carbonized	C	from Apr 2007
273.31	Silica and quartz sands	B	from Jul 1999
278.3	Salt	A	from Mar 2008
284.21	Nickel mattes	A	from Jul 1988
285.2	Alumina (aluminium oxide)	B*	from Jul 1988
286.1	Uranium ores	B	from May 1989
286.2	Thorium ores	B	from Nov 2002
287.83	Titanium ores and concentrates (eg rutile)	A, B	Quantity data released on a 6 month basis
287.84	Zirconium ores and concentrates	A, B	Various
287.85	Tantalum ores and concentrates	A, B	from Jul 2001
287.99	Base metal ores and concentrates nes	A, B	from Jul 2000
288.10	Slag, ash and residues (specifically tantalum glass)	B	from Jan 2002
292.94	Vegetable saps and extracts	A	from Sep 2002

SITC Code	Description	Restriction Type	Period
321.21	Bituminous coal, not agglomerated (specifically semi coking coal)	C	Various
335.25	Oils and other products (specifically Naphthalene)	A	From Mar 2003
343.1	Liquefied natural gas	B	from Aug 1995
421.21	Crude cotton seed oil	A	from Oct 1988
511.25	Styrene	A	from Oct 1999
522.1	Carbon (incl black carbon), nes	A	from Jan 2006
522.53	Manganese oxides	A	from Nov 1995
522.67	Artificial corundum	A	from Feb 2002
523.64	Sodium triphosphate (sodium tripolyphosphate)	A	from Mar 2002
523.72	Neutral sodium carbonate (disodium carbonate)	A,B	from Mar 1992
523.73	Sodium hydrogencarbonate (sodium bicarbonate)	A,B	from Mar 1992
523.81	Cyanides (specifically Sodium cyanide)	B	from Sep 2002
524.94	Carbides (specifically Silicon carbide)	A	from Jul 1999
541.41	Alkaloids of opium	A	from Jul 1991
541.49	Other vegetable alkaloids (specifically Vegetable alkaloids, salts, ethers, esters & other derivatives)	A	from Jul 2004
541.99	Other pharmaceutical goods (specifically Sterile surgical sutures)	A,B	from Feb 2004
571.11	Polyethylene	A,B	from Nov 1992
572.19	Polystyrene (non-expansible)	A,B	from Jan 1988
574.33	Polyethylene terephthalate	A	from Feb 2003
598.64	Activated carbon	B	from May 2006
634.54	Medium density fibreboard	A,B	from Nov 1988
667.12	Unworked cultured pearls	B	from May 1995
667.22	Sorted diamonds, non-industrial	A	available on a quarterly basis after a 6 month lag
671.41	Ferro-manganese (containing by weight 2% carbon)	A	from Aug 1999
671.52	Ferro-silico-manganese	A	from Aug 1999
672.62	Semi-finished prod. of iron/non-alloy steel	A	from Sep 2000
673	Flat-rolled products of iron/non-alloyed steel not clad, plated or coated (specific thickness only)	A	from Sep 2000
674	Flat-rolled products of iron/non-alloyed steel clad, plated or coated (specific thickness only)	A	from Aug 2000
683.1	Nickel and nickel alloys, unwrought	A	from Feb 2003
683.23	Nickel powders and flakes	A	from Feb 2003
723.21	Front end shovel loaders	A	from Jan 2003
793.28	Cruise ships and similar vessels designed to transport persons	A	from Feb 2004

* Special case. See "Confidentiality" section in Explanatory Notes.

For more details on the confidentiality of foreign trade statistics, please see the Australian Bureau of Statistics website at <http://www.abs.gov.au> under Themes – International Trade – Confidentiality.

Appendix E

Goods and services rankings

Commodity rankings

The ranking of Australia's top exports and imports is usually based on merchandise (goods) trade only. DFAT ranks merchandise trade using the United Nations *Standard International Trade Classification Rev4* (SITC). SITC is a hierarchical trade commodity classification with five different levels, with the 5-digit codes aggregating to the 4-digit level and so on to the 1-digit level. SITC does not include services.

When ranking merchandise exports and imports, DFAT uses SITC at the 3-digit level (approximately 260 codes). At this level, all Australia's goods exports are easily identifiable with meaningful descriptions, i.e. *Coal, Iron ore, Gold, Crude petroleum, Beef, Wheat, Alumina, Aluminium, Natural gas, Passenger cars* etc.

To measure the contribution of services activities to exports and imports, the SITC classification was combined with the ABS Extended Balance of Payments (EBOP) services classification to derive Australia's top 25 exports and imports. The ABS EBOP services classification is based on the United Nation publication *Manual on Statistics of International Trade in Services* (MSITS) and the International Monetary Fund's (IMF) sixth edition of the *Balance of Payments Manual* (BPM6).

Services classified by EBOP were integrated into the SITC 3-digit merchandise rankings at the 1-digit level covering 12 broad services activities with the exception of:

- *Transport, Travel and Other business services*. As these three codes accounted for more than 80 per cent of Australia's total services exports and imports, so activities at the 2-digit EBOP level was used to provide more detail on the types of services traded in these broad categories; and
- For *Personal travel services* only, the 3-digit EBOP level was used to separate out *Education-related travel services* and *Other personal travel services* – Australia's two largest services exports activities.

Using this method, Australia's top 25 exports and imports of goods and services are shown in Tables 2 and 3 in this publication.

In addition to the rankings DFAT, has also included two analytical industry series in these tables covering trade by the Education and Tourism industries.

Education includes the following EBOP codes – *Education-related-travel services* (EBOP 4.2.2), *Royalties on education services* (EBOP code 8.5.1) and *Other education services* (EBOP code 11.2.2).

Tourism is based on the ABS Tourism Satellite Account (TSA):

- The TSA measures the consumption of goods and services by the tourism industry, with an aim to measure the direct contribution to the Australian economy of the tourism industry. The TSA defines tourism consumption to include all travellers who stay in the host economy for less than one year, regardless of their purpose for travel (such as business, education, health and recreational purposes). As such the TSA definition of exports and imports of tourism is much broader than the general understanding of tourism services (i.e. covering just recreational travellers).
- The TSA definition includes all or part of the following services activities from the EBOP trade in services classification: *Passenger air and Sea transportation services* and *Related agency fees & commissions; Travel services* (including *Business travel, Education-related travel* and *Other personal travel*) as well as imputed services which are not measured in the EBOP classification, such as goods provided to visitors in private households; and
- The TSA data is only available on a financial year basis. For more information on the TSA please refer to the ABS publication *Tourism Satellite Accounts* (catalogue 5249.0).

Users should not include these two analytical series in the goods and services rankings as they would **double count** particular EBOP services items. For example to include *Tourism* into the rankings without adjusting other EBOP items would double count all or part of *Business, Education, Other personal travel services* and *Passenger transport services*.

Country rankings

DFAT estimates total trade in goods and services on a regional basis by adding goods (merchandise) data on a recorded trade basis with services data on a balance of payments (BOP) basis. DFAT has been producing these estimates since the ABS ceased publishing its regional BOP publication in 1999-00 (this publication contained regional goods and services both on a consistent BOP basis).

As DFAT cannot convert merchandise trade data to a BOP basis to be consistent with ABS published services data, DFAT's current methodology to produce regional goods and services estimates has a number of issues that users should be aware of:

- *Net exports of goods under merchanting* will not be included in DFAT's regional goods and services statistics as it is not included in ABS merchandise trade statistics. This export was valued at \$353 million in 2009;
- Imports of *Goods procured in port* will not be included in DFAT's regional goods and services statistics as it is not included in ABS merchandise trade statistics. This import was valued at \$1.2 billion in 2009; and
- Exports and imports of *Goods for processing* includes the gross value of the good as reported in ABS merchandise trade statistics, but also double counts the processing fee recorded in ABS services trade statistics under *Manufacturing services on physical inputs owned by others*. The processing fee was valued at \$329 million for exports and \$4 million for imports in 2009.

DFAT has analysed the impact of these issues on its regional estimates (for 2008-09) and has found that they are relatively insignificant. For exports only; one country (the United States) was out by more than 1 per cent. For imports only six countries are impacted by more than 1 per cent, with the exception of imports from Hong Kong (which was out by plus 15 per cent, mainly due to imports of *Goods procured in port*).
